(*ii*) a condition is made for the insertion in the settlement of provisions, to be approved by the Local Government, for the discharge of the incumbrances, or

II of 1882

(2) The provisions of sections 4, 5 and 6 shall apply to all applications for permission to make a supplementary settlement.

(3) When an application for permission to make a fresh settlement is received, the Local Government may, in its discretion, after such inquiry (if any) as it may think fit to make, by written order, either—

(i) reject such application, or

(ii) grant permission to make the proposed settlement, in respect either of the whole of the property to which the application relates or of any part thereof.

Form, publication and duration of permission

11. (1) Every permission granted under any of the foregoing sections shall be in writing signed by one of the Secretaries to the Local Government, and shall contain a description of the property or person in respect of which the permission is granted, sufficient to identify the same. (2) Every such instrument shall bear a stamp of a value equivalent to one-fourth of the annual net profits of the estate comprised in the settlement:

Provided that a stamp of one-third of such value may be affixed, with the previous sanction of the Board of Revenue, on arrangements being made to its satisfaction for the affixing of stamps for the rest of such value at subsequent dates within three years from the date of the instrument.

(*The Bengal Settled Estates Bill.—Sections 13-18.*)

(*3*) If any question arises, with reference to sub-section (*2*), as to the amount of the annual net profits of any estate, the decision of the Board of Revenue thereon shall be final.

[Bill of 1893, cl. 4 (7)]

Abrogation of inconsistent laws.

14. No settlement duly made under this Act shall be liable to be avoided or set aside, and no provision therein shall be invalidated, by reason only that it contravenes—

(*c*) any family custom or any personal law or law of succession to which the family is subject.

Revocation of settlement by tenant for life.

15. (*1*) A tenant for life of a settled estate may, at any time, if he is competent to contract, apply to the Local Government for permission to revoke, either wholly or as respects any particular property, any settlement made under this Act. [U. P. Act II of 1900, s. 8]

(*2*) The Local Government, after considering the application, and the result of any inquiry made by it or under its orders, and any further particulars or information called for by it, may, in its discretion, by written order, either—

(*b*) to be amended so as to exclude any portion of the estate described in the notification.

(*2*) On the publication of such notification the said settlement shall be deemed to be cancelled or amended as aforesaid, as the case may be.

17. Except as provided in sections 18 and 19, a tenant for life of a settled estate shall not be entitled to sell, transfer, dispose of, alienate or convey, or to create any incumbrance upon, or to lease, the estate or any part thereof, or any of the profits thereof, for any greater interest or time than during his life. [U. P. Act II of 1900, s. 15.]

Sales by tenant for life.

18. A tenant for life of a settled estate may, with the previous written consent of the Local Government, sell the estate or any portion thereof: [B. I. Bill of 1893, s. 4 (*3*).]

Provided that the proceeds of every such sale shall be paid either—

(*a*) to the Official Trustee, if a deed be executed, in pursuance of section 8 of the Official Trustees Act, 1864, appointing him to be the trustee of such proceeds, or (XVII of 1864.)

(*b*) if the Local Government so directs, to the Collector or to some other public servant,

to be held by him in trust to re-invest the same, with the previous written consent of the Local Government, in immoveable property, which shall, upon such re-investment, be and remain subject to the settlement in like manner, as if it had been originally comprised therein.

(*The Bengal Settled Estates Bill.—Sections 19-22.*)

Leases by tenant for life.

19. (*1*) A tenant for life of a settled estate may lease the estate or any part thereof from year to year or for any term not exceeding seven years, or (with the previous written consent of the Collector) for any term not exceeding fourteen years, or (with the previous sanction of the Local Government) for any longer term. [U. P. Act II of 1900, s. 16.]

(*2*) No premium or fine shall be taken on any such lease except with the previous written consent of the Collector.

(*3*) When any premium or fine is so taken, the sum received shall be paid—

(*a*) to the trustee appointed in pursuance of section 9, sub-section (*3*), or

(*b*) if the settlement does not comprise money or moveable property, to a trustee to be appointed for the purpose;

and shall be held by such trustee as part of the settled estate, and shall be invested by him in securities authorized by section 20 of the Indian Trusts Act, 1882. II of 1882.

(*4*) In respect of every such lease the best rent shall be reserved that can reasonably be obtained, and the rent shall be payable quarterly.

(*5*) No payment of any instalment of such rent made before it falls due shall operate to the prejudice of any successor in interest of the persons to whom the payment is made.

Saving of laws as to agricultural tenancies.

20. Nothing in sections 17, 18 and 19 shall affect the provisions of the Bengal Tenancy Act, 1885, or any other law relating to agricultural tenancies. [U. P. Act II of 1900, s 18.] VIII of 1885.

Sale of settled estate for arrears of land-revenue, &c.

21. (*1*) Notwithstanding anything contained in the Bengal Land Revenue Sales Act, 1859, or any other law, no settled estate or part of a settled estate shall, without the previous sanction of the Local Government, be sold, during the life of any tenant for life thereof for an arrear of land-revenue or for any other arrear which is recoverable in the same manner as an arrear of land-revenue. [Ben. Act IX of 1879, s. 28, cl. 1.] XI of 1859.

(*2*) If any settled estate or part of a settled estate be sold with the sanction required by sub-section (*1*), the resulting surplus shall be dealt with in the manner described in the proviso to section 18; and if the estate or any part thereof be purchased at the sale by the tenant for life, or by any person on his behalf, the same shall, notwithstanding the sale, continue to be subject to the settlement.

Procedure for recovery of such arrears.

22. (*1*) If any such arrear accrues in respect of a settled estate during the life of any tenant for life thereof, and if the sale of the estate or part thereof for the recovery of the arrear is not sanctioned by the Local Government under section 21, the Collector may attach the estate, [Ben. Act IX of 1879, 28 (2).]

and shall thereupon be entitled, to the exclusion of all other persons, to receive all rents and other moneys (if any) due to such tenant in respect of such estate,

and may manage the estate, either directly or through a manager, for such period as may be necessary for the recovery of such arrear.

(*2*) Upon the expiration of the period referred to in sub-section (*1*), the Collector shall deduct from the proceeds of the management the amount of the said arrear and of any similar arrears that may have accrued during such period, and any interest due thereon, and the expenses incurred in the management, and shall then— [Ben. Act IX of 1879, s. 28, prov.]

(*a*) pay the balance of such proceeds to the person then entitled to hold the estate, and

(*b*) furnish such person with an account of the receipts and expenditure during the management, and

(*c*) release the estate to such person.

(The Bengal Settled Estates Bill.—Sections 23, 24.)

(3) If, after a settled estate held by a tenant for life has been managed and released by the Collector under sub-sections (1) and (2), any such arrear as aforesaid again accrues in respect of the estate during the life of the same tenant, and if the sale of the estate or part thereof for the recovery of the arrear is not sanctioned by the Local Government under section 21,

the Court of Wards may take charge of and deal with the estate under the provisions of the Court of Wards Act, 1879; and shall, notwithstanding anything contained in that Act, retain such charge until the death of such tenant and, if his successor is then a minor, until such minor attains his majority; Ben. Act IX of 1879.

and the said tenant shall, from the date when the Court of Wards so takes charge of the estate, and during his life, be debarred from receiving any income from the estate other than such monthly sum as the Court of Wards may allow for the support of himself and his family;

and the powers conferred by sections 18 and 19 of this Act shall, during the life of the said tenant, be exerciseable by the Court of Wards and not by the said tenant.

Notifications how to be published.

23. Every notification prescribed by this Act shall be published in the Calcutta Gazette and also in such Vernacular Gazettes (if any) as the Local Government may direct. [U. P. Act II of 1900, ss. 5, 9, (2), 13 (2), 14.]

Power to make rules.

24. (1) The Local Government may, after previous publication, make rules for carrying out the purposes of this Act. [U P. Act II of 1900, s. 20.]

(2) In particular, and without prejudice to the generality of the foregoing provision, the Local Government may make rules for all or any of the following matters, namely:—

(a) the procedure to be followed in submitting an application to the Local Government under this Act;

(b) the form and contents of such applications, and the documents (if any) which should accompany them;

(c) the guidance of the Collector in managing estates attached under section 22;

(d) the payment or recovery of any expenses incurred by the Government in connection with any proceedings taken under this Act.

STATEMENT OF OBJECTS AND REASONS.

THE desirability of undertaking legislation for the family settlement of immoveable property in Bengal, with the object of preserving old or wealthy families from decay, maintaining their territorial influence, and preventing the subdivision of estates of historical and political importance, has long been under the consideration of Government. After a prolonged discussion of the matter between the Government of India, the Bengal Government and some of the leading Associations of landholders and individuals most closely concerned, sanction has been obtained for the introduction of a Bill in the Local Legislative Council, subject to the approval of His Majesty's Secretary of State for India.

2. The object of the Bill is to make provision in special cases approved by Government for preserving the continuity of noble and influential families whose estates are not protected by the existing law from division on the decease of the proprietor.

3. The principal provisions of the Bill are as follows:—

(a) Any qualified landholder may apply for permission to make a settlement of his estate under the Act, but it will be in the absolute discretion of Government to accept or reject such application (clauses 3 and 4).

(b) Provision is made for the notification of applications under the Act, for the consideration of objections, and for the discharge of incumbrances (clauses 5 and 6).

(c) Settlement is limited to three generations, including the settlor. If the eldest or only son is excluded, good reasons must be shown and must be approved by Government (clause 7).

(d) The settlement must provide for the maintenance of widows, unmarried daughters, and other relations of the settlor (clause 9).

(e) Settlements must be of a non-testamentary character, and must be attested and registered (clause 12).

(*f*) Instruments of settlement will be subject to a stamp duty equivalent to ⅟₄th of the annual net profits of the estates settled. The Board of Revenue may allow realisation of this stamp duty to be spread over a period not exceeding three years (clause 12).

(*g*) A settlement may be revoked with the consent of Government (clause 15).

(*h*) Alienations and leases by the tenant for life are restricted (clauses 17 and 19). Sales may be made only with the previous consent of Government, and sale proceeds must be paid to the Official Trustee or District officer in order to be re-invested in immoveable property which will be subject to the conditions of the original settlement (clause 18).

(*i*) The sanction of Government will be required to the sale under Act XI of 1859 of settled estates for arrears of land revenue or other arrears recoverable as arrears of land revenue (clause 21).

This shoal was originally placed on the chart from a single cast of the lead got in H.M.S. *Racoon* when proceeding out of harbour. It has also been searched for by an Italian man-of-war without success, and it has now therefore been expunged from the Admiralty publications.

Dated Darjeeling, the 14th July 1903

RESOLUTION.

READ—

The Annual Report on the Police Administration of the Town of Calcutta and its Suburbs for the year 1902.

Read also—

The Reports for the two previous years and the orders of Government recorded thereon.

Mr. R. A. D'O. Bignell held charge of the office of Commissioner of Police during the year, with the exception of the period from the 1st to the 15th of January, when Mr. F. L. Halliday acted for him. The only change in the sanctioned strength of the Calcutta Police was the entertainment of an additional force of 1 Inspector, 3 European constables, and 24 native officers and men for the purpose of regulating the traffic on and around the Howrah Bridge.

2. The discipline of the large force, which numbered 3,262 officers and men, was on the whole satisfactory, and departmental punishments decreased. On the other hand, judicial punishments increased from 11 to 20 and dismissals from 65 to 90, the former figures in each case being those of the previous year.

3. The total number of cognizable cases of all classes was 29,604 as against 25,115 in 1901. In these figures, however, are included a large number of offences of a petty nature, and in an examination of the serious crime of Calcutta the cases which fall under Class VI of the prescribed statements may be excluded. These relate to various petty offences, the larger proportion of which are infractions of the Police Act, the Nuisance laws, and the Cruelty to Animals Act. Under this head there was an increase of 4,784 cases as compared with the figures of the preceding year. Excluding such offences, 4,926 cognizable cases were reported as against 5,221 of the preceding year—a satisfactory decrease.

Of the 720 cognizable cases instituted before a Magistrate, 151 were dismissed without summoning the accused, while of the remainder only 92 ended in conviction—a percentage of 12·7 on institutions.

Of the police cases, 2,393 were sent up for trial, of which 1,934, or 80·8 per cent., ended in conviction. These latter figures indicate that the Calcutta Police have on the whole shown commendable discretion in sending up cases for trial.

The results of investigations of murder cases were not entirely satisfactory, as in 4 out of 11 cases the offenders were not detected.

4. The institutions under the Police Act, which betrayed such a remarkable decrease last year, have risen again to what may be regarded as an approach to the normal figure. They were 8,628 as against 5,809 in 1901, 10,037 in 1900, and 11,098 in 1899.

The rise no doubt indicates a return of confidence to the police force, especially in dealing with offences relating to traffic, to the lack of which the Commissioner of Police last year attributed the decrease in the number of offences reported. In view of the remarkable fluctuations in these cases, the Lieutenant-Governor trusts that the superior officers of the Calcutta Police will carefully control and scrutinize the action of their subordinates in connection with charges under this Act.

A considerable decrease in the number of cases under the Cruelty to Animals Act is noticeable. These cases numbered 5,554 as against 6,294. No explanation is given of this decrease, which it would perhaps be too sanguine to assign to the beneficent operation of the Act alone.

5. The total number of offenders who were tried by the Courts in whose cases proof of previous conviction was admissible was 2,667, of whom 1,993 were convicted. No less than 837 persons convicted were old offenders, against whom previous convictions were proved, *i.e.*, 42 per cent. of the total number convicted. If cases of theft by a servant, and criminal breach of trust,—crimes which are rarely attended by previous conviction, and which numbered 1,095—be excluded, the percentage would be even more striking. These figures establish beyond doubt that those who commit crimes against property in Calcutta are professional criminals. Out of the 837 persons previously convicted, no fewer than 491 had two or more convictions, and 100 had already been convicted on *five* previous occasions. In these circumstances, the Lieutenant-Governor observes with much surprise and regret that only 30 of these offenders were committed to the Sessions. The Penal Code has given to the superior Courts the power to sentence to prolonged periods of imprisonment offenders whose past histories show that they habitually prey on the property of their fellow-citizens, and it is essential that when these pests of society are convicted, they should be severely punished. It appears to the Lieutenant-Governor that the figures just quoted *primâ facie* indicate that the Magistracy of Calcutta have been too ready to deal summarily with old offenders who should have been committed to the Sessions Court.

6. One hundred and thirty-one cases were declared false, a considerable increase on the figures of the two preceding years, viz., 82 and 73, respectively. The Lieutenant-Governor observes, moreover, that in 13 cases only were proceedings instituted, as a result of which 1 accused was fined and 5 were sentenced to terms of imprisonment varying from one to three months. These figures warrant the conclusion that the police were overcautious in instituting such prosecutions, and the Courts unduly lenient in dealing with the offence when established. The difficulty of obtaining a conviction on a charge of

instituting a false case is no doubt great, but when in 90 per cent. of the cases the persons against whom this offence is established before the police escape all consequences of their acts, the conclusion seems irresistible that caution is pushed too far: and having regard to the apparently light punishments inflicted in the cases which ended in conviction, the serious character of the offence seems to have been hardly sufficiently apprehended by the Courts.

7. Fourteen thousand six hundred and thirty-eight non-cognizable cases were instituted during the year. The number pending at the commencement of the year was 1,013, and at the close of the year 1,550 cases were pending. The Lieutenant-Governor observes with dissatisfaction the large increase in the number of pending cases. On examining the figures of pending cases, it appears that no less than 1,308 cases out of 1,550 remained under investigation otherwise than by the police. Such discredit as these figures suggest, must fall therefore on the Courts and not on the police.

8. The report in its revised form was not received by Government till the 30th of June. It was due on the 30th of April, and thus was two months late. It is within the prescribed limit of 15 pages, but it might be rearranged and perhaps curtailed with advantage.

9. His Honour's thanks are due to the Commissioner and his subordinate officers for their efficient control of a difficult and important department during the year.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Police, Calcutta, for information and for communication to the Presidency Magistrates.

Ordered that a copy of the Resolution be forwarded to the Commissioner of the Presidency Division, the Chairman of the Corporation of Calcutta, and the Municipal Department of this Government, for information.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

Upon such application the Judge shall issue a summons for proceeding with the winding up of the Company, to be served upon all parties who may have appeared upon the hearing of the petition. Upon the return of such summons, a time shall be fixed for the appointment of an Official Liquidator, for the proof of debts and for bringing in the list of contributories. Directions may be given as to the advertisements to be issued for all or any of such purposes, and generally as to the proceedings, and the parties to attend thereon. The proceedings under the order shall be continued by adjournment, and, when necessary, by further summons, and any such direction as aforesaid may be given, added to, or varied, at any subsequent time, as may be found necessary.

11. The Official Liquidator shall be appointed by order, and unless he shall have given security a time shall be fixed by such order within which he is to do so, and the order shall fix the times or periods at which the Official Liquidator is to bring into Court his accounts of his receipts and payments, and shall direct that all moneys to be received shall be paid into the Bank of Bengal, or into Court, immediately after the receipt thereof, to "the account of the Official Liquidator of the Company," and an account shall be opened accordingly, and if the money is payable into the Bank of Bengal, an office copy of the order shall be lodged with the said Bank.

12. When an Official Liquidator has given security pursuant to the directions in the order appointing him, the same shall be certified by the Judge or Registrar.

13. The Official Liquidator shall, on each occasion of passing his accounts, and also whensoever the Judge may so require, satisfy the Judge that his sureties are living and resident in British India, and have not become insolvent or been adjudged bankrupt, and in default thereof he may be required to enter into fresh security, or to deposit Government securities within such time and to such amount as shall be directed.

14. Every appointment of an Official Liquidator shall be advertised, in such manner as the Judge shall direct, immediately after he has been appointed and has given security.

15. Where it is desired to appoint provisionally an Official Liquidator, an application for that purpose may, at any time after the presentation of the petition for winding up the Company, be made by petition without advertisement or notice to any person unless the Judge shall otherwise direct. Such Provisional Official Liquidator may, if the Judge shall think fit, be appointed without security.

16. Such salary or remuneration may be fixed either at the time of the appointment or at any time thereafter, as the Judge may think fit. Every allowance of such salary or remuneration, unless made at the time of the appointment, or upon passing an account, shall be made upon application for that purpose by the Official Liquidator, on notice to such persons (if any), and supported by such evidence as the Judge shall require. Provided, nevertheless, that the Judge may, from time to time, allow any sum he may think fit to the Official Liquidator on account of the salary or remuneration to be thereafter fixed.

19. The accounts of the Official Liquidator shall be filed in Court at the times directed by the order appointing him, and at such other times as may, from time to time, be required by the Judge; and such accounts shall, upon notice to such parties (if any), as the Judge shall direct, be verified and passed in the same manner as Receivers' accounts.

PROOF OF DEBTS.

20. For the purpose of ascertaining the debts and claims due from the Company and of requiring the creditors to come in and prove their debts or claims, an advertisement shall be issued at such time as the Judge shall direct; such advertisement shall fix a time for the creditors to send their names and addresses, and the particulars of their debts or claims, and the names and addresses of the attorneys or pleaders (if any), to the Official Liquidator, and appoint a day for adjudicating thereon.

21. Creditors whose claims are not disputed need not attend upon the adjudication, nor prove their debts or claims.

The Official Liquidator shall investigate the debts and claims sent in to him, and ascertain, so far as he is able, which of such debts and claims are justly due from the Company; and he shall make out and file in Court a list of all the debts and claims sent into him, distinguishing which of the debts and claims, or parts of debts and claims, are, in his opinion, justly due and proper to be allowed without further evidence, and which of them, in his opinion, ought to be proved by the creditors; and he shall make and file, prior to the time appointed for adjudication, an affidavit or written statement verified by oath or affirmation setting forth which of the debts and claims, in his opinion, are justly due and proper to be allowed without further evidence, and stating his belief that such debts and claims are justly due and proper to be allowed, and the reasons for such belief.

23 At the time appointed for adjudicating upon the debts and claims, or at any adjournment thereof, the Judge may either allow the debts and claims, upon the affidavit or verified statement of the Official Liquidator, or may require the same, or any of them, to be proved by the claimants, and adjourn the adjudication thereon to a time to be then fixed; and the Official Liquidator shall give notice of such allowance to the creditors whose debts or claims have been allowed.

24. The Official Liquidator shall give notice to the creditors whose debts or claims have not been allowed, upon his affidavit or statement, that they are required to come in and prove the same by a day to be named in the notice, being not less than four days after such notice, and to attend at a time to be therein named, being the time appointed by the advertisement, or by adjournment (as the case may be) for adjudicating upon such debts and claims.

25. The value of all contingent debts and claims admissible to proof shall, so far as is possible, be estimated according to the value thereof, at the date of the order to wind up the Company.

27. Such creditors as come in and prove their debts or claims pursuant to notice, from the Official Liquidator, shall be allowed their costs of proof, in the same manner as in the case of debts proved in a suit.

28. The result of the adjudication upon debts and claims shall be stated in a certificate to be signed by the Judge, and certificates as to any of such debts and claims may be made from time to time. All such certificates shall state whether the debts or claims are allowed or disallowed, and whether allowed as against any particular assets, or in any other qualified or special manner.

LIST OF CONTRIBUTORIES.

29. The Official Liquidator shall, with all convenient speed, after his appointment or at such time as the Judge shall direct, make out and file in Court a list of the contributories of the Company; and such list shall be verified by the oath or solemn affirmation of the Official Liquidator, and shall, so far as is practicable, state the respective addresses, and the number of shares or extent of interest to be attributed to each such contributory, and distinguish the several classes of contributories. And such list may, from time to time, by leave of the Judge, be varied or added to by the Official Liquidator.

30. Upon the list of contributories being filed in Court, the Official Liquidator shall obtain an appointment for the Judge to settle the same, and shall give notice in writing of such appointment to every person included in such list, stating in what character, and for what number of shares or interest, such person is included in the list; and in case any variation or addition to such list shall at any time be made by the Official Liquidator, a similar notice in writing shall be given to every person affected by such variation or addition. All such notices shall be served four clear days before the day appointed to settle such list, or such variation or addition.

31. The result of the settlement of the list of contributories shall be stated in a certificate signed by the Judge; and certificates may be made from time to time, for the purpose of stating the result of such settlement down to any particular time, or as to any particular person, or stating any variation of the list.

SALES OF PROPERTY.

32. Any moveable or immoveable property belonging to the Company may be sold, with the approbation of the Judge, in such manner as the Judge shall direct and the Judge may, on any sale by public auction, fix a reserved bidding, and unless on account of the small amount of the purchase-moneys or other cause it shall, having regard to the amount

of the security given by the Official Liquidator, be thought proper that the purchase-moneys shall be paid to him, all conditions and contracts of sale shall provide that the purchase-moneys shall be paid by the respective purchasers into the Bank of Bengal, or into Court, to the account of the Official Liquidator of the Company.

34. When any order for a call has been made, a copy of such order shall be forthwith served upon each of the contributories included in such call, together with a notice from the Official Liquidator specifying the amount due from such contributory in respect of such call; but such order need not be advertised unless, for any special reason, the Judge shall so direct.

35. At the time of making an order for a call, the further proceedings relating thereto shall be adjourned to a time subsequent to the day appointed for the payment thereof and afterwards from time to time, so long as may be necessary; and at the time appointed by any such adjournment, or upon a summons to enforce payment of the call duly served, and upon proof of the service of the order and notice of the amount due, and non-payment, an order may be made for all or any of the contributories who have made default to pay the sum which by such former order and notice they were respectively required to pay, or any less sum which may appear to be due from them respectively.

There are no other assets belonging to the said Company, except the amounts due from certain of the contributories of the said Company, and, to the best of my information and belief, it will be impossible to realize in respect of the said amounts more than the sum of Rs or thereabouts.

In order to provide the said sum of Rs , it is necessary to make a call upon the several persons who have been settled on the List of Contributories as before mentioned, and having regard to the probability that some of such contributories will partly or wholly fail to pay the amount of such call, I believe that, for the purpose of realizing the amount required as before mentioned, it is necessary that a call of Rs. per share should be made.

RE-IMPORTATION OF RIFLES OF MILITARY PATTERN.

No. 2752, dated Simla, the 20th July 1903.

From—A. WILLIAMS, Esq., Deputy Secretary to the Govt. of India, Home Dept.,
To—The Chief Secretary to the Government of Bengal.

I AM directed to refer to the correspondence ending with your letter No. 96J.D., dated the 17th April 1903, on the subject of the re-importation of rifles of military pattern.

2. In reply, I am to say that the Governor-General in Council has decided that the re-importation of such weapons should be permitted subject to the following conditions, viz.—

(1) that the examination of the arms at the Custom House at the time of export shall be compulsory;

(2) that, as a general rule, export passes giving a full description of the weapons to be exported shall be obtained from the Collector of Customs by the persons exporting the weapons;

(3) that these passes shall be accepted by the Collector of Customs as the best proof of export on the weapons being satisfactorily identified at the time of re-importation; and

(4) that, in cases in which such export passes have not been obtained, it will rest with the Collector of Customs personally to accept such other proof of export as he may consider reasonable and proper.

3. The Government of India will be glad if the Collector of Customs is required to submit a monthly return of the weapons imported under these provisions. I am to request that, with the permission of His Honour the Lieutenant-Governor, the necessary instructions may be issued to the Customs authorities, and steps taken to make the orders known to the public.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

[Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.]

o, overcast; d, drizzling rain; p, passing temporary showers; t, thunder; ∠, lightning.

N. B.—In the weekly abstract from 28th June to 4th July 1903 read 2·83 for 83 as the total fall of rain from 28th June to 4th July 1903.

If an Assistant Settlement Officer decides the case, there will be an appeal to the Settlement Officer, and if the Settlement Officer decides the case, there will be an appeal to the Commissioner. When the Settlement Officer differs from the Assistant Settlement Officer on appeal, there will be a second appeal to the Commissioner.

In other cases the order of the appellate court shall not be subject to further appeal, but the Commissioner, the Deputy Commissioner, or the Settlement Officer may, of his own motion or otherwise, call for the record of any case decided by a Court under his control, in which an appeal does not lie, or in which, for cause shown to his satisfaction, an appeal has not been preferred within the limit of time prescribed in the succeeding rule, and may pass such orders as he thinks fit.

Before the 5th of the following month, the Managing Committee will furnish the Municipal Office with an account showing all the receipts and charges of the Dispensary Fund and a memorandum reconciling the closing balance of the account with that shown at credit of the fund in the pass-book. Rule 25.—Omit the whole.

Rule 26.—Omitthe words "all subscriptions, ... shall be kept."
Insert the following additional rules:—

Rule 26A.—Dispensaries in class II are subdivided for purposes of Account into two classes: class IIA—Dispensaries for which separate banking accounts are allowed to be opened in the Treasury with the sanction of the Government, and class IIB—Dispensaries for which separate accounts are not allowed at the Treasury, but the funds of which are kept under the direct control of the local authority.

(*a*)—CLASS IIA—DISPENSARIES.

(1). All subscriptions and donations shall be collected by the Managing Committee, and shall be paid into the Treasury for credit to the Dispensary Fund. The income from endowments and investments shall, however, be realised by the local authority, and shall be remitted by it to the Treasury for credit to the Dispensary Fund, an advice being sent at the same time to the Managing Committee. If any cheques or remittance orders are received, they should be sent intact to the Treasury for *per contra* credit to the Dispensary Fund.

All claims should be discharged either by payments from the imprest placed by the Committee in the hands of the Medical Officer in charge or by cheques drawn by the Secretary or the President upon the Treasury in favour of the actual payees. The imprest in the hands of the Medical Officer shall not ordinarily exceed Rs.

(2). If it is necessary for the local authority to make a contribution to supplement the Dispensary Funds, such contribution should be paid in quarterly instalments on the first day of each quarter by cheques which should be made payable by transfer to the credit of the dispensary account in the Treasury These amounts will be credited in the cash-book of the Managing Committee as contribution from the local authority by *per contra* debit as remitted to the Treasury.

(3). The Managing Committee shall keep a cash-book in Form No. IX-A, in which shall be entered all receipts and payments with necessary details as soon as the transactions occur. The cash-book should be closed every month, and a memorandum recorded reconciling the balance with that shown in the pass-book. A copy of the monthly account supported by vouchers for the payments made and signed by the President of the Committee shall be forwarded to the office of the local authority before the 5th of the succeeding month for incorporation in their accounts.

The transactions of the Dispensary Fund with the Treasury will be shown in a pass-book, which will be supplied gratis by the Treasury. The pass-book shall be closed and balanced at the end of every month. It should be examined by the Secretary of the Committee every time that it is received back from the Treasury to see that all the transactions have been duly entered therein. At the close of every month the Treasury Officer will prepare a memorandum showing the opening balances, monthly receipts and payments and the closing balances of the several Dispensary Funds banking with the Treasury, and enter this memorandum in the pass-books of the local authority to which the dispensaries belong, to enable it to verify the balances.

(*b*)—CLASS IIB—DISPENSARIES.

(1). As regards these dispensaries, the interest on the investments will be accounted for by the local authority direct. But all donations and subscriptions will be collected by the Managing Committee and paid into the office of the local authority, and there accounted for in the usual way.

(2). All claims in respect of these institutions shall be either paid from the imprest in the hands of the Medical Officer in charge, or discharged by the local authority concerned on bills duly passed by the Managing Committee, by issue of cheques upon the Treasury.

(3). The Managing Committee shall keep a monthly account showing all transactions of the dispensary, including the contributions payable by the local authority, and forward a copy of this account to the local authority at the end of every month for comparison with the accounts kept at the office of the local authority concerned.

QUESTIONS AND ANSWERS.

SUBORDINATE JUDGE FOR NOAKHALI.

The Hon'ble MAULVI SERAJ-UL-ISLAM, KHAN BAHADUR, asked—

Has the attention of the Government been called to a letter of the Noakhali correspondent, published in the *Bengalee* of the 28th June, 1903, regarding the inconvenience and harassment caused to litigants, owing to the delay in the disposal of Civil Suits by the District Judge of Noakhali, in consequence of the greater portion of his time being taken up by Sessions Cases and Criminal Appeals?

In view of the above, will the Government be pleased to post a Subordinate Judge at Noakhali; or make some other arrangement to redress the grievances of the people?

The Hon'ble MR. MACPHERSON replied:—

"The Lieutenant-Governor has read the letter in the *Bengalee* newspaper to which the Hon'ble Member refers.

"The question of appointing a Subordinate Judge in Noakhali has been for some time under the consideration of the Hon'ble High Court and the Bengal Government, and the matter is now before the Government of India."

CIRCULAR ISSUED BY THE DISTRICT MAGISTRATE OF MYMENSINGH.

The Hon'ble MAULVI SERAJ-UL-ISLAM, KHAN BAHADUR, asked—

Has the attention of the Government been called to an article in the *Amrita Bazar Patrika* of 6th June, 1903, headed "A most dangerous Circular"? Is it a fact that such a Circular has really been issued by the District Magistrate of Mymensingh to the Subordinate Magistrates of the district? If so, does not the Government think that it is calculated to interfere with the judicial independence and discretion of the Subordinate Magistrates?

The Hon'ble MR. MACPHERSON replied:—

"The article to which the question refers was brought to the notice of the Lieutenant-Governor. The District Magistrate's attention has been drawn to the High Court's Circular Order of the 16th June, 1900, and he was requested to withdraw any circular which he may have issued in transgression of that order."

RE-ORGANIZATION OF THE SUBORDINATE EXECUTIVE SERVICE.

The Hon'ble RAI TARINI PERSHAD, BAHADUR, said—

The Hon'ble the Financial Secretary, in laying on the table the Bengal Budget Estimate for 1903-1904, observed: "The re-organization of Sub Deputy Collectors has not yet been finally sanctioned"; and in that estimate Rs. 1,00,000 was allotted for the improvement of the status of the Sub-Deputy Collectors, one-half of which was shewn under the head of "Land Revenue" and the other half under the head of "Law and Justice"; and further in paragraph 30 of the explanatory notes on that estimate it was stated that "the increase under (1) is due to larger provision made under salaries for the proposed re-organization of the Subordinate Executive Service, which is awaiting the sanction of the Government of India." Will the Government be pleased to lay on the table the scheme for such re-organization, shewing how it has proposed to spend the said sum of Rs. 1,00,000, and to state whether such scheme has since received the sanction of the Government of India?

The Hon'ble MR. MACPHERSON replied:—

"The scheme has not yet received the sanction of the Government of India, and it is not at present possible to publish the details of it, which are still under careful consideration."

MISCONDUCT OF RAILWAY EMPLOYÉS AT ASANSOL STATION.

The Hon'ble RAI TARINI PERSHAD, BAHADUR, asked—

Has the attention of Government been drawn to a scrap appearing in the *Amrita Bazar Patrika* of 13th June, 1903, complaining of the oppressive and impertinent conduct of Railway employés towards respectable passengers, and, amongst them, a Sub-Deputy Magistrate at the Asansol station, travelling with his family?

The Hon'ble MR. INGLIS replied:—

"The East Indian Railway authorities have instituted inquiries into this matter, and will no doubt deal with it effectively."

WAITING-ROOM FOR NATIVE LADIES AT ASANSOL STATION.

The Hon'ble RAI TARINI PERSHAD, BAHADUR, asked—

Is the Government aware that there is no suitable waiting-room for native ladies at the Asansol Railway station, and that a memorial has been presented to the East Indian Railway Authorities with a view to remove this want?

Will the Government be pleased to direct the Railway Authorities to arrange for some sort of *purda* accommodation on the down platform of the Asansol Railway station for native ladies, who are put to very great inconvenience on this account?

The Hon'ble MR. INGLIS replied:—

"The Lieutenant-Governor is informed that there is already a room set apart for native ladies on the up platform, and one on the down platform is being provided."

SUPERINTENDENT OF STAMPS AND STATIONERY.

The Hon'ble RAI TARINI PERSHAD, BAHADUR, asked—

Will the Government be pleased to state whether, in disposing of the post of Superintendent of Stamps and Stationery on retirement of Mr. Manson, it is not intended to give preference to the claims of such members of the Executive Branch of the Provincial Service as have, by their ability, experience and meritorious work, fitted themselves for that post?

The Hon'ble MR. SHIRRES replied:—

"The whole question of the organization of the Stamps and Stationery Department, and of the status of the officer who may, in future, be appointed to hold charge of it, is now under consideration. Until the question is decided, Government is not in a position to say how future incumbents of the post of Superintendent will be recruited."

THE CHOTA NAGPUR TENANCY (AMENDMENT) BILL, 1903.

The Hon'ble MR. SLACKE in presenting the Report of the Select Committee on the Bill to amend the Chota Nagpur Landlord and Tenant Procedure Act and the Chota Nagpur Commutation Act, 1897, said:—"I have now, Sir, the honour to present to this Council the Report of the Select Committee on the Chota Nagpur Tenancy (Amendment) Bill, 1903, and in so doing would, with your permission, make some remarks with regard to certain of the matters referred to in the revised Bill. Copies of the Bill, as originally introduced, were sent to all those most interested in the districts to which it applies. The Bill itself was considered at a very representative meeting held at Ranchi in April last. The views then expressed have been duly considered, and the

Hon'ble Members of the Select Committee have been most materially assisted by the gentleman who will shortly take his seat in this Council as the Member for Chota Nagpur.

"In the Statement of Objects and Reasons attached to the Bill, as introduced into this Council, it was stated that the proposed amendments were designed to meet certain objects, eleven in number. Of these, one has been abandoned by the Select Committee, *viz.*, that to prevent the exacting of more than customary rates of rent from non-occupancy raiyats. The reasons for this have been stated in the Report. Five additional objects have been provided for in the clauses of the revised Bill. They are the following: (1) to make certain changes in procedure; (2) to provide for an appeal against orders passed in execution of decrees; (3) to grant the right of a second appeal to the High Court; (4) to remove, as far as possible, the causes which have tended to foster the agitation that has been disturbing the *Mundaris* for so long a time; and lastly (5) to bring the procedure of the Commutation Act of 1897 into line with that followed by the Settlement Officer, with regard to the record-of-rights when a survey and record-of-rights is being prepared, and predial services, etc., have to be compulsorily commuted.

"The first essential with regard to the admissibility of a proposed change was whether urgency could be pleaded in its favour. Unless this could be satisfactorily demonstrated, the adoption of a suggested amendment has not been recommended to this Council. Failing the necessary data which cannot as yet be furnished by the Settlement Officer, and which will not probably be fully available for a few years, it is impossible now to say to what extent the principle contained in the term 'settled raiyat' should be applied to Chota Nagpur. This affects the provision in the original Bill for facilitating the acquisition of occupancy rights. Although imperfect, it has been retained because it met some cases. Any attempt to improve it further would have led to the adoption, in some shape or other, of the principle of the 'settled raiyat,' a subject which, as I have just said, cannot be yet discussed.

"But advantage has been taken of the present opportunity to embody in the Bill a custom which is generally followed by all good landlords, *viz.*, to declare that the holder of lands known as *Korkor* or some other synonymous term has a right of occupancy in them. I would explain that *Korkor* is the term used to designate a field which a raiyat, by his own efforts, has converted from upland into riceland by terracing, and it presupposes the existence of a village which the term *khunt katti* does not. Clause 4 of the Bill restricts the sale or transfer of a raiyat's holding. The necessity for these restrictions must be explained. The right of a raiyat to sell his holding is not recognized in the Division, save in pargana Dhalbhum, in the district of Singhbhum.

"But though not recognized, raiyats are gradually more and more, though slowly, beginning to sell their holdings, and in course of time a custom will be established, unless measures are now taken to check it. Not to check the growth of any such custom would most probably result in the reduction of a vast number of the raiyats to the condition of serfs. There are already signs that this may happen, for in Dhalbhum the purchases by *mahajans* of raiyati holdings for the purpose of subletting them again at heavy rentals are increasing rapidly. To prohibit sale merely would not suffice.

"There are two recognised systems of usufructuary mortgage, *viz.*, the *zarpeshgi* and the *bhoogkut bundha*. Under the former of these the profits arising from the land go merely to repay the interest due. Under the latter such profits extinguish both principal and interest. The former system is a most dangerous one among an aboriginal people, for though the debtor—a man who never thinks of the morrow and is always carried away by impulse—does not part with his land out and out and knows that he can get it back again on payment of the principal, yet in many cases such repayment is quite outside the man's means. Thus the *zarpeshgi* system tends to create a landless race, and the provisions in the Bill will, if accepted, do away with it.

"Of the danger of allowing transfer a good example is to be found in Ranchi in the case of the tenures registered under Bengal Act II of 1869. Of the tenures with which this Act dealt, one class, known as *bhuinharri*, was

in reality merely holdings, and consisted of small areas of a few acres each cultivated by the aboriginal holders themselves. It was then held that the right of transfer attached to such tenures. The result has been ruinous, for to-day but very few are in the possession of the original holders or their descendants, having been parted with to others to obtain loans.

"The section in the original Bill, which prohibited the sale of a raiyati holding, under any circumstances, was copied from the Central Provinces Act. In the Bill relating to that Act provision was made for the sale of a raiyati holding in execution of a decree for arrears of rent, but this was abandoned in the interests of the landlords who considered that the power of ejecting a defaulter was more to their advantage than that his holding should be brought to public sale. Here the converse is the case. The good landlords in Chota Nagpur consider that ejectment for failure to pay rent in the case of an occupancy raiyat is too harsh a remedy, and they point out that unless sale in execution of a decree for arrears of rent accruing on the holding itself is allowed, the defaulter will inevitably lose a portion of the value of the labour which he and his predecessors have put into the holding.

"Chota Nagpur is an undulating series of plateaus full of valleys, which in course of time have been, through the exertions of the tenants, terraced and converted into rice-fields. The gross value of the labour by which this conversion has been effected is immense. On the other hand, the total prohibition of sale and the retention of ejectment as the remedy has in one case been welcome as a means for getting rid of aboriginal tenants, and introducing in their places others who are better cultivators. Under these circumstances, I trust that the course selected by the Select Committee will commend itself to this Council, *viz.*, in the case of an occupancy raiyat to prohibit ejectment for failure to pay rent and allow a remedy by the sale of the holding, but only for arrears of rent accruing on the holding itself.

"To facilitate the obtaining of loans from Government under the Loans Act, it is provided that a holding for which a loan may have been granted can be sold to liquidate the debt. For this there is a precedent in the Central Provinces Act.

"In favour of the retention of the penalties provided in clauses 5 and 6 of the Bill with regard to the levy by landlords of anything in excess of what is legally due and to the non-giving of receipts, I would bring to the notice of this Council that much of the discontent that now characterises the relations between landlords and tenants in some parts of the Chota Nagpur Division, especially Ranchi, is due to the absence of any practical remedy to check such exactions, and to ensure that receipts are given. It is true that under the present Act a raiyat in the case of the landlord levying anything in excess of what is due, has a remedy by suit, but experience has fully shown that to give an aboriginal a remedy by suit is to give him no remedy at all. The tenant who has the means to institute a suit is not the tenant who will be oppressed, and the vast majority of the tenants in Chota Nagpur are persons who have not the means to go to the Courts.

"The preparation of a record-of-rights, such as is now being made, will provide landlords with what they have never hitherto possessed, *viz.*, data that are beyond suspicion and which can be utilized for the enhancement of rents. I have already pointed out that the law, even when amended as proposed, will not be satisfactory with regard to the question of occupancy right, and that nothing at present can be done to remedy this.

"The existing law is also sadly wanting in safeguards as to enhancement of rents. These two defects cannot be remedied until the work now being carried on by the Settlement Officers has progressed far enough to furnish the requisite data. The Settlement Officer at present is not allowed to enhance or fix fair rents, but is restricted to recording the existing rents, including settlements and predial services. Until these defects in the law have been removed, it is clear that unless some protection to the tenantry is now given much injustice may be done, and in all probability the people, seeing what will result, would probably stop any further continuance of the Settlement Officer's work. The periods provided in the original Bill were fifteen years in the case of occupancy raiyats and five for non-occupancy. To the Select Committee it appeared that for the purpose in view fifteen years for the former

of the original founder, or that of an individual member of the brotherhood over the lands in his immediate possession.

"The Settlement Officer, owing to the burial custom of the *Mundaris*, can easily ascertain whether the claim to hold certain lands as *khunt katti* is true or not. No *Mundari* can rightly be buried save in the burial ground of the village of which his ancestor on the paternal side was the founder. When a *Mundari* wished to found a new village he either alone or with some of his kinsmen on the paternal side obtained the jungle tract he desired. The area so acquired was invariably large, in some cases extending to square miles. His object was to bring by himself, or through his male descendants, portions of it under cultivation, but it was open to him or his male descendants acting jointly, to give portions to other *Mundaris* either to cultivate as raiyats or to establish other *khunt katti* villages. The system is one which originated long before the advent of the Hindus into Chota Nagpur. Originally no rent was payable, but this was changed. Rent and services came to be demanded, and were given. This rental was, and is in most cases a permanent one, and cannot be enhanced save under certain circumstances as given in section 19 of the existing Act.

"It has therefore been found, *firstly*, that the landlord has no power of control over the internal affairs of the village. *Secondly*, that the *khuntkattidars* of a village must be the male descendants of one family, and hence members of the same *killi* or *gotra*. *Thirdly*, that the tenancy is not a tenure or a raiyati holding in the sense that now attaches to those terms, but that it partakes, to some extent, of the nature of both. *Fourthly*, that where the pure *khuntkatti* system prevails there is no recognized system of transfer, save (*i*) to men of the same race, and that only for cultivation, or (*ii*) to *mahajans* temporarily for financial needs. *Fifthly*, that a transfer requires the joint consent of the brotherhood. *Sixthly*, that the resident male descendants of the original grantee have equal rights. *Seventhly*, that the rental can only be enhanced under the conditions given in section 19 of the Act.

"For the purposes of village administration it is necessary that there should be an executive and also a spiritual head. The former is the *Munda*, and the latter the *Pahun*. The grantee, if alone, combined both offices, and on his death his eldest son became the *Munda*, and his second son the *Pahun*. These posts became as a rule hereditary in the families of these sons. The *Munda* is the spokesman and representative of the brotherhood in secular matters relating to the village, and so far as the brotherhood is concerned has no greater rights than any of the other members. But in his name the village came to be registered in the *sarrishta* of the landlord, and hence arose one of the causes that has led to the disintegration of so many of these *khuntkatti* villages and the discontent of the *Mundaris*. Seeing that the tenancy was in the name of the *Munda* only, the Courts treated him as a tenure-holder and the other members of the brotherhood as his tenants. Consequently when the rent fell into arrears he alone was sued, and his supposed rights sold. On getting possession the purchaser, an alien, proceeded to treat the other members of the brotherhood as if they were raiyats or even as mere tenants-at-will. The knowledge of this has also induced many *Mundas* themselves to destroy the rights of their weaker brethren, and thereby gradually obtain for themselves the position of petty zamindars.

"Wherever in a *khuntkatti* village the process of disintegration has set in, there will be found some lands in the possession of the descendants of the original founder and held by them as *khuntkatti* lands. Such portions of land were those that were registered and dealt with under the name of *bhuinharri* lands by the Special Commissioners who carried out the provisions of the Chota Nagpur Tenures Act, 1869. Babu Rakhal Dass Haldar, an officer, who for over nine years was engaged on this work, described such lands as the remnants of the old *khuntkatti* tenures.

"As I have already said, the Act to which I have just referred did not provide for the registration of whole *khuntkatti* villages, though their nature and that of the *bhuinharri* lands was the same. In 1871 Mr. Oliphant, then Deputy Commissioner of what is now known as Ranchi, recommended that a simple demarcation with registration should be made of all such *khuntkatti* villages in order to make the holders secure in the possession of their holdings.

But Colonel Dalton, the then Commissioner, thought this would be exceedingly difficult, except as part of a regular revenue survey of the district. Accordingly the proposal was rejected by Government on the ground that nothing had occurred to bring the *khuntkattis* to special notice. It is much to be regretted that no such survey and registration was then effected. For since 1871 many villages, then wholly *khuntkatti*, have ceased to be such. The work of destruction has been chiefly effected through the agency of the Courts assisted by a political agitation in the shape of a refusal to pay rent and by the greed of the *Mundas*. Such villages became what, for want of a better term, I can only call mutilated *khuntkatti* villages. They are to be found in all stages of decay, but in each are lands held by descendants of the founder and claimed as *khuntkatti*. I have refrained from using the term *bhuinharri* to describe such lands because since the passing of the Act of 1869 a certain legal significance has become attached to that term, which it is not desirable to adopt here. Apart from this, however, the terms are really synonymous. They were so employed by Dr. Davidson in 1839, and are still so used by the people in the south-east of Ranchi.

"The sections in the revised Bill with regard to *Mundari khuntkattidari* tenancies embody what the Select Committee, after hearing and examining Mr. Lister, consider to be essential in order to allay, as far as possible, the agitation which has been going on for so long a time among the *Mundaris*. Their acceptance will greatly weaken the agitation, but will not satisfy the extreme party of the *Mundaris*, whose wishes are impossible of attainment, as they want the Government to go back to what, in their opinion, was the state of the country before the Hindus entered it.

"The objects it is desired to secure are (1) to prohibit sale; (2) to stop all forms of mortgage save that known as *bhcoghut bundha*, and thereby prevent these savages becoming the serfs of money-lenders; (3) to follow recognized custom and allow certain forms of transfer to other *Mundaris*; (4) to invest the Deputy Commissioner with power to give effect to this prohibition of sale and certain restrictions on transfer; (5) to provide for the realization of arrears of rent; (6) to secure the finality of the record-of-rights. The joint and individual responsibility of the members of the brotherhood of a *Mundari khuntkattidari* tenancy with regard to the rent will be noted in the record-of-rights as well as the nature of the right, whatever it may be, of the landlord to resume. As to prohibition of sale, I would point out that the idea of sale is repugnant to the *Mundaris*, wherever they have not come under the influence of alien theories. Writing in 1871, Mr. Oliphant, whom I have previously mentioned, advocated the enforcement by law of the prohibition issued in 1832-33 by Captain (afterwards Sir Thomas) Wilkinson, the Governor-General's Agent, forbidding *Mundars* to part with their lands to foreigners or aliens. Speaking of the rules under the Chota Nagpur Tenures Act in relation to *bhuinharri* lands, Mr. Webster, I.C.S., in 1875, pointed out that the right of transfer thereby granted was an innovation. Writing in 1880, Babu Rakhal Das Haldar, to whom I have already referred, stated with regard to *bhuinharri* lands that where they were held jointly or under the control of a single Head *bhuinharri*, no transfer can be made unless with the consent of all the members. The procedure devised for the realisation of arrears of rent in the case of tenancies for which a record-of-rights has been prepared will for the first time give the *Munda* a practical means to compel defaulting members of the brotherhood to pay up their quotas. Hitherto he was quite unable to do this, as he had not the means, for the cost of a suit was prohibitive, since in individual cases the sums due amounted to only a few annas. Hence when through the advice of the *sardars* the members of the brotherhood refused to pay any rent the *Munda* was helpless, and when the *Munda's* own credit no longer sufficed to enable him to raise the requisite sum, the tenancy was sold up. Under the powers now proposed to be given, the Settlement Officer will be able not only to secure for the members of a *Mundari khuntkatti* brotherhood in an intact *khuntkatti* village the safe enjoyment of their tenancy, but will also be able to protect from further molestation the *Mundaris* who are the descendants of the original founder of a village and hold *khuntkatti* lands in mutilated *khuntkatti* villages.

"It may be asked why not, instead of these sections, employ the Chota Nagpur Tenures Act of 1869? To that I would reply that this Act either does not go far enough or goes too far. It does not provide for intact *khunt-katti* villages. It provides no prohibition against sale. It does not regulate transfer other than sale. It does not provide for recovery of arrears of rent. It treats such tenancies as tenures, which they are not. Lastly, it provides for retrospective effect, and that in the present instance could not be asked for. I would here read to the Council what the Settlement Officer states on the subject, since it describes exactly what is intended to be done:—

'In other villages the descendants of the *khuntkattidars* are treated as ordinary raiyats by the *Munda* or by the Dikku zamindar. Here, too, we must ascertain what lands they have continued to cultivate from *khuntkatti* days, and record them as *khuntkatti*. Even if the zamindar has enchanced the rent of such lands, contrary to the customary rights of the cultivators, whilst we cannot repair the injury, we can prevent future wrong-doing by recording the real nature of the lands.'

"Turning to the proposed amendments in the Commutation Act of 1897 (Ben. IV of 1897), it will be seen that in the revised Bill certain changes in procedure are proposed where a survey and record-of-rights is being carried out, and Government has issued an order under section 5 of the Act for the compulsory commutation of *rakumats* or payments in kind and predial services. The commutation of these *rakumats* and services having been decided on, the experience gained by the Settlement Officer shows that unless the procedure under the Act is assimilated to that for the record-of-rights, a large part of the work will have to be done twice over, and as the cost of commutation will have wholly to be met by the landlords and tenants, this will entail on them a heavy burden. To save this, which for the district of Ranchi alone would come to some lakhs of rupees, the change in procedure has been suggested."

The Council was adjourned to Saturday, the 1st August, 1903.

1. Fan rang bay.—A lighthouse is in course of construction in Fan rang bay, but the character of the light to be exhibited from it is not yet decided.

   Approximate position, lat. 11° 34′ N., long. 109° 4′ E.

   The exact position of the lighthouse is not stated.

2. Lon (Tré) island.—A lighthouse is being constructed on Lon island from which it is intended to exhibit a *white group flashing* light showing groups of *three flashes every fifteen seconds*. The tower will be of granite, 40 feet high, and the duration of each flash will be under one-tenth of a second. The light will be elevated 315 feet above high water, and visible in clear weather from a distance of 24 miles.

   Approximate position, lat. 12° 11¾′ N., long. 109° 10′ E.

   This light will probably be exhibited for experiment in 1904.

   Approximate position, lat. 12° 13′ N., long. 109° 12′ E.

4. Cape Varella.—A *white group flashing* light showing groups of *two flashes every ten seconds* will be established in a cylindrical tower of granite, 46 feet high, now being erected on the point to the southward of cape Varella, the duration of each flash will be one-tenth of a second; it will be elevated 318 feet above high water, and visible in clear weather from a distance of 24 miles.

RESOLUTION.

INCOME-TAX BRANCH.

THE HON'BLE MR. C. E. BUCKLAND, C.I.E.

Dated Calcutta, the 10th July 1903.

THE statistical information regarding the Income-tax Department, for the year 1902-1903, has been compiled with reference to the Government of India's Resolutions Nos. 2316S.R., dated the 8th May 1901, and 83S.R., dated the 14th January 1903.

* * * * * * *

3. The following statement compares the receipts, charges and net revenue with those of the previous year:—

YEAR.	Receipts.	Charges.	Percentage of charges.	Net revenue.
	Rs.	Rs.		Rs.
1902-1903	58,66,787	2,12,463	3·6	56,54,324
1901-1902	56,56,735	2,13,398	3·8	54,43,337
	+2,10,052	−935	−·2	+2,10,987

The net revenue showed an increase of 3·9 per cent., as compared with an increase of 7·5 per cent. in 1901-1902.

4. *Return No. III.*—The collections upon the profits of companies showed a noticeable increase of Rs. 1,02,393, or 18·4 per cent. in comparison with the preceding year, and it is explained by the Collector of Income-tax, Calcutta, that the assessments on Jute Companies and Jute Presses were mainly responsible. Coal Companies do not manifest much improvement, and the returns from Cotton Mills and Insurance Companies were poor. Outside Calcutta, the receipts under this head were largest in the district of Dacca, where the collections advanced from Rs. 152 during 1901-1902 to Rs. 7,285 during the year under report, but the Commissioner has not explained the fluctuation. The results under other parts did not present special features.

5. *Return No. V.*—The amount of tax remitted rose from Rs. 71,130 in 1901-1902 to Rs. 1,04,158 during the year under report. The remissions in Calcutta (Rs. 85,159 in comparison with Rs. 51,017 during the preceding year) were mainly responsible for this result, but the figures were unduly swollen by the inclusion of remissions of Rs. 35,976 on account of the year 1899-1900 and of Rs. 25,052 on account of the year 1900-1901. The figures for the year 1901-1902 had only included remissions on account of previous years (1898-1899) to the extent of Rs. 29,516.

6. *Return No. VI.*—The number of persons finally assessed shows an increase of 2,053, or 1·7 per cent., as compared with 3·8 per cent. during the previous year. The final demand for the year rose by Rs. 1,47,989, or by 2·9 per cent. in comparison with 8·2 per cent. during 1901-1902. The demand increased by over 10 per cent. in the districts of Balasore (30·01), Singhbhum (19·3), Tippera (14·3) and Hazaribagh (10·2),—attributable, generally, to more thorough assessments. The results in Balasore are reported to have been mainly achieved by the enhancement of the demand from well-to-do assessees who had been previously under-assessed.

The demand decreased by over 10 per cent. in Manbhum (11·06), owing to the exemption from assessment of bonuses paid for the settlement of coal-bearing lands and to the dull state of the coal trade.

7. The percentage of collections on the final demand on account of the tax for the year was 96·6, as compared with 96·3 during 1901-1902. The districts of Burdwan, Dacca, Noakhali, Champaran and Malda succeeded in collecting the entire demand within the year. The prescribed standard of 95 per cent. was attained in all the other districts except Jalpaiguri, the 24-Parganas and Calcutta, where the percentages were 94·7, 94·03, and 94·7, respectively. The low percentage of collections in Jalpaiguri was due to the non-realisation of the sum of Rs. 1,041-10-8, being the tax of one assessee whose objection was pending before the Commissioner. As regards the 24-Parganas, it is reported that, a larger area having been taken up for revision than in previous years, a considerable number of assessments could not be completed earlier than the close of the third quarter of the year, and consequently a large amount of tax covered by objections was not legally due before the end of the year. There was also some difficulty experienced on account of the wide publicity given to the Government notification raising the assessable minimum from Rs. 500 to Rs. 1,000, towards the end of the year, several assessees professing to believe that these orders had retrospective effect. The failure in attaining the prescribed standard of collection in Calcutta during the year is ascribed to the fact that many assessments had to be made during the last quarter of the year. The difficulty is with the assessment of firms and companies and after special enquiry during the year, the Board were persuaded that it was a practical one.

By order of the Board of Revenue, L P,

H. WHEELER,

Secretary.

THE HON'BLE MR. C. E. BUCKLAND, C.I.E.

Dated Calcutta, the 6th July 1903.

THE annual statistics of the Stamp Department for the year 1902-1903 are submitted to Government in the forms of Statements I to VII as revised by the Government of India in the Finance and Commerce Department Resolution No. 838.R., dated 14th January 1903, which formed an enclosure to the Bengal Government order No. 672S.R., dated the 6th February 1903.

2. The figures of general receipts and charges for the year 1902-1903, furnished in Statement I, though obtained from the Accountant-General, have not as yet been finally verified, and are therefore liable to subsequent adjustment.

3. The revenue collected under the Stamp and Court-fees Acts amounted to Rs. 1,95,68,939, against Rs. 1,90,05,559 in the previous year, with a consequent increase of Rs. 5,63,380. The figures adopted for the revised budget estimate for the year were Rs. 1,95,00,000, and the actuals therefore exceeded the estimate by Rs. 68,939. The increase of revenue occurred both under judicial and non-judicial stamps. The total charges during the year amounted to Rs. 4,95,497, or an increase of 0·3 per cent. over the figures for 1901-1902. The increased expenditure was mainly due to the allowance of discount to vendors on the larger sales effected.

4. Statements II and III, which show the receipts from the sale of the different kinds of stamps under the heads Judicial and Non-judicial in the several districts, have been compiled mainly from figures furnished by the Superintendent of Stamps, Calcutta. It will be noticed that there is a discrepancy of Rs. 72 between the figures of total receipts in these statements and those furnished in Statement I. This cannot be reconciled until finally verified statistics are received from the Accountant-General.

5. The sale-proceeds of court-fee stamps, excluding stamps for copies, rose from Rs. 1,26,43,091 to Rs. 1,31,09,400, that is, by Rs. 4,66,309. The largest increase, amounting to Rs. 1,87,665, occurred in Calcutta, which the Collector attributes mainly to the payment of probate duty in respect of three large estates. The increase of Rs. 45,547 in the 24-Parganas is chiefly due to the large number of applications made for mutation of names in respect of holdings in the Government estate Panchannogram. The advance in other districts is generally attributed to an increase in the number and value of civil suits. Decreases of over Rs. 10,000 occurred in the districts of Hooghly (Rs. 12,771), Backergunge Rs. 18,016), Noakhali (Rs. 10,674), Patna (Rs. 30,853), Shahabad (Rs. 18,267), Muzaffarpur (Rs. 36,770), and Purnea (Rs. 17,083). The smaller value of civil litigation is usually adduced in explanation, but in two of the three districts of the Patna Division (Patna and Shahabad) the prevalence of plague affected the work of the Courts, and in Purnea the figures of the preceding year had been unusually swollen by one particular case (paragraph 28 of the Board's report upon the operations of the triennium ending 1901-1902).

6. Non-judicial stamps yielded an increased revenue to the extent of Rs. 48,722, or 0·9 per cent., compared with the year 1901-1902. The increase was shared by all classes of stamps, except impressed stamps, *hundis*, share transfer, and notarial stamps. The revenue derived from the sale of impressed

stamps amounted to Rs. 35,59,590, against Rs. 36,05,461 in the preceding year. No very conclusive explanation is forthcoming; fewer deeds were executed, and hence the result. The revenue derived from the sale of *hundis*, or inland bills of exchange, was Rs. 1,25,486, showing a decrease of Rs. 7,054 as compared with the receipts of the preceding year. The largest increase (Rs. 76,442) is under the head of impressed labels, which are used only in Calcutta, and it is attributed to the more extensive execution of conveyances and trust mortgages on account of the holders of debentures of certain Companies. There was a satisfactory increase in the sale of one-anna receipt stamps, which was especially marked in Calcutta. The increase in the sale of forms for cheques or receipts is attributed to the briskness of trade and to the use of embossed cheques by municipalities and other local bodies.

7. Statement IV shows the number of vendors entrusted with the sale of stamps, as also the discount allowed to them. The total number of vendors employed in the sale of judicial and non-judicial stamps during the year was 6,821, or an increase, as compared with the previous year, of 66 persons. A considerable reduction in the number of vendors was effected in the Chota Nagpur Division by the elimination of those whose transactions were insignificant.

The expenditure during the year exceeded that of that preceding by Rs. 2,135,—the result of the increased sales and the larger discount allowed in consequence.

8. Statement V exhibits the number of cases in which deficient duty and penalty were levied by the Courts or by persons entitled to receive evidence under section 35, and by Collectors under sections 32, 37, 40, and 41 of Act II of 1899. The total number of cases dealt with by Civil Courts during the year shows an increase of 377, but there was a decrease of Rs. 4,260 in the duty and penalty realised, in comparison with the figures of the preceding year. This was especially noticeable in the district of Dacca. On the other hand, there was a decrease of 536 in the number of cases decided, but an increase of Rs. 27,622 in the duty and penalty realised by Revenue Officers, as compared with the figures of the preceding year. The large increase in the amount of duty and penalty is mainly due to the payment of Rs. 29,170 on seven instruments dealt with by the Collector of Stamp Revenue, Calcutta, but the Board had occasion to complain of a certain want of discretion displayed in several of the orders passed by this officer, and in more than one case reductions in the amount of penalty assessed were ordered on appeal.

9. Statement VI shows the results of the prosecutions instituted for the infringement of the provisions of the Stamp Act. The number of cases instituted was 220, in which 252 persons were brought to trial, against 567 cases and 497 persons in the preceding year. The fines imposed amounted to Rs. 1,557 in comparison with Rs. 4,047 in 1901-1902, while the amount distributed in rewards was Rs. 551, against Rs. 2,647. The falling off in the number of cases instituted in Calcutta was very marked, but no special explanation has been given.

10. Statement VII shows the results of the action taken by Collectors to test the valuation of estates in respect of which probates and letters of administration had been applied for during the year ending the 31st March 1903. In one case appertaining to Calcutta, for the year 1901-1902, the administratrix of an estate failed to pay the amount of deficit court-fees adjudged, and under the orders of the Board, a penalty of Rs. 200 was inflicted. Realisation was effected during the year under report. Of the cases reported during 1902-1903, 78·2 per cent. were enquired into. The corresponding percentage in the preceding year, was 75·9. The proportion borne by the deficit duty realised, to the amount originally paid, was 14·0 per cent., as compared with 8·8 per cent. in the preceding year.

By order of the Board of Revenue, L. P.,

H. WHEELER,

Secretary.

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

[Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.]

o, overcast; d, drizzling rain; p, passing temporary showers.

RESOLUTION.

BY the Resolution of the Government of India in the Foreign Department, No. 3129-I.-A., dated the 19th August 1901, the Residents in Hyderabad, Mysore, Baroda, Kashmir, and Nepal, the Agent to the Governor-General in Baluchistan, and all Political Officers in Rajputana and Central India are empowered to grant licenses for the export of arms and ammunition (subject to certain exceptions) to the Native States under their political charge irrespectively of whether they are required for personal use or for sale. It has now been decided to modify the restrictions imposed by the Resolution, *firstly*, by removing rifles of ·577 bore of the Snider pattern and also magazine pistols from the category of military weapons, and, *secondly*, by authorising Political Officers to grant licenses, in certain cases, for the export of rifles of ·303 bore and of ·450 bore of the Martini-Henry pattern, and of a limited quantity of ammunition for use with those weapons.

It has also been agreed that other Political Officers serving under Local Governments should be invested with similar powers.

(2) to remit the fee of Rs. 5 in the case of arms and ammunition exported for the personal use of persons of the classes mentioned in paragraph 1 of the same notification:

Provided that the power thus conferred upon Political Officers shall not extend—

(*a*) to cannon; or

(*d*) save as hereinafter provided, to balled ammunition which can be fired from rifles of the bores and pattern specified in sub-head (*c*):

Provided, secondly, that, notwithstanding anything contained in sub-head (*c*) of the first proviso, licenses for the export of rifles of the bores and pattern there specified may be granted to persons of the classes mentioned in paragraph 1 of the notification above cited, subject to the condition that the rifles must either have been in India on the 20th February 1901, or have since been imported with the special sanction of the Government of India:

Approximate position, lat. 13° 45½′ N., long. 109° 13½′ E.

The light will probably be exhibited for experiment at the end of 1903.

7. Nau Chau island.—A *white flashing* light *every five seconds*, elevated 311 feet above high water, and visible in clear weather from a distance of 26 miles, will be established in a cylindrical tower of stone, 62 feet high, now being erected on the summit of Nau Chau island.

Approximate position, on Chart No. 875, lat. 20° 54′ N., long. 110° 35½, E.

This light will probably be exhibited experimentally in March 1904.

RESOLUTION ON THE ANNUAL REPORT ON THE REFORMATORY SCHOOLS AT ALIPORE AND HAZARIBAGH FOR THE YEAR 1902.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 10th August 1903.

RESOLUTION—No. 2007.

READ—

The Annual Report on the Reformatory Schools at Alipore and Hazaribagh for the year 1902.

The Annual Report on the Reformatory Schools at Alipore and Hazaribagh accords in size and form with the instructions issued by the Government of India. The year under report is the third year during which these institutions have been managed by the Education Department.

2. *Admissions.*—The number of admissions during the year was 156, against 120 during the year 1901, while the number of boys in the schools at the end of the year was 454, as compared with 428 on the 31st December, 1901. The increase in the annual number of admissions since 1899, when they amounted to 99 only, is very noticeable, and emphasises the need, referred to in last year's Resolution, of ascertaining whether any of the boys admitted could not have been more suitably dealt with under the provisions relating to youthful offenders, as contained in the Criminal Procedure Code and Reformatory Schools Act.

It is satisfactory, therefore, to observe that the Boards of Management, with this object in view, examined the admissions during the year under report, with the result that 12 boys, against 4 in 1901, were released. It has been ascertained from the judicial returns that 274 youthful offenders were discharged on probation of good conduct under section 562 of the Criminal Procedure Code, and that 39 boys were discharged after admonition or made over to parents and guardians under section 31 of the Reformatory Schools Act.

3. *Health, Discipline, and Education.*—The health of the boys was, on the whole, satisfactory. The punishments imposed at the Alipore School were, as usual, much more numerous than at Hazaribagh. Boys received from the metropolitan area are, it is reported, less amenable to discipline than those from rural areas, and it has been found necessary to make provision at Alipore for the segregation of incorrigible offenders. Progress has been made as regards education at both the schools: at Alipore the Kindergarten system of teaching has been introduced, while the teaching staff has been strengthened and the school department has been reorganised. Physical development has received attention both at Alipore and Hazaribagh: it is expected that the extension of the compound of the former school, which has recently been sanctioned, will remove the difficulty which has been hitherto felt there as regards the want of a suitable play-ground.

4. *Industries.*—In accordance with the established policy of Government, boys of the agricultural classes were sent to the Hazaribagh School, where cultivation and market-gardening are specially taught, while boys belonging to the industrial castes were concentrated at the Alipore School, where they are instructed in various industries. The figures with regard to the occupations followed by boys after release are still very disappointing. Only 47 out of 151 boys released from the Alipore Reformatory during the three years preceding the year under report were, during that year, found to be engaged in the industries which they had been taught at school. Out of 227 boys released from the Hazaribagh School during the same period, only 17 out of 159 were employed in the trades which had been taught them: on the other hand, no less than 91 were engaged in agriculture, against 68 who had been trained to it, while 42 boys, who had not received any agricultural training, followed that calling on leaving the school. The obvious inference is that a correct policy has been initiated at Hazaribagh, where special attention is now being paid to the teaching of agriculture. As regards Alipore, the desirability of boys being taught the trades which they might be expected to follow in after-life was emphasised in last year's Resolution. In reply to the orders of Government on this subject, the Board of Management pointed out that it was impracticable to teach every boy the occupation followed by his caste, or by his father, as the case may be, the tables submitted by them with their report showing that the 211 boys who were, at the time, in the school belonged to 44 different castes, and that their fathers followed 63 different occupations. The Board have, however, undertaken to comply with the wishes of Government in this matter to the best of their ability, and the question is still the subject of correspondence between them and Government. In particular, the proposal to train boys for employment in jute mills and other similar institutions, which was raised in the Resolution referred to, has been under special discussion, and a report from the Board on the subject is now under consideration.

5. *Licensing.*—The Lieutenant-Governor is glad to observe that the system of licensing out has been more extensively followed than in previous years. Besides the 18 boys already working under the license rules at the close of the year 1901, as many as 66 boys (48 from the Alipore and 18 from the Hazaribagh School) were licensed out, against 39 during the preceding year. In the case of the Alipore School it is to be regretted that no less than 16 of these boys were either rejected for bad work or threw up their positions voluntarily. The large proportion of failures shows that greater care must, in future, be exercised in the selection of boys for such employment. Notwithstanding this, the general results are decidedly hopeful, and His Honour acknowledges with pleasure that much of the success which has been secured in this matter is attributable to the assistance afforded by the Bengal Chamber of Commerce and the Bengal National Chamber of Commerce.

6. *Tracing of Discharged Boys.*—There has been some improvement as regards following up the histories of boys for three years after their release; the percentage of failure to trace out such boys to the total number discharged having fallen to 20 per cent. in the year 1901, against 34 per cent. in 1899. It seems clear, however, that Educational Officers have not yet fully realised their duties in this matter. Boys are now released in the presence of officers of the Education Department, and, as observed in last year's Resolution, that Department commands the sympathy of the people at large. In the absence, therefore, of any explanation of the large percentage of failures still reported, the Lieutenant-Governor cannot but hold that the officers of the Department have failed in this matter to attain the results which might reasonably have been expected of them.

By order of the Lieutenant-Governor of Bengal,

A. EARLE,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE CIVIL VETERINARY DEPARTMENT, BENGAL, AND OF THE BENGAL VETERINARY COLLEGE.

REVENUE DEPARTMENT—AGRICULTURE.

Calcutta, the 8th August, 1903.

RESOLUTION—No. 2625.

READ—

The Annual Report of the Civil Veterinary Department, Bengal, and of the Bengal Veterinary College, for the year 1902-1903.

Read also—

Letter No. 1496A., dated the 3rd July, 1903, from the Director of the Department of Land Records and Agriculture, Bengal, submitting the above report with his remarks.

The Annual Report of the Civil Veterinary Department, Bengal, and of the Bengal Veterinary College accords, in length and form, with the instructions which have been given on the subject.

2. *Veterinary Dispensaries and Veterinary Assistants.*—During the year under review, the work of the Department was extended to the Chota Nagpur Division, where two new dispensaries were opened, viz., one at Ranchi and the other at Daltonganj, the total number of dispensaries in Bengal open at the close of the year being 20. The Lieutenant-Governor has read with pleasure the good accounts given generally of these dispensaries. His Honour also observes with satisfaction the very large increase which has occurred in the number of animals treated at these institutions, the number of in-patients received having been 903, as against 737 in the previous year, and that of out-patients 24,911, as against 8,892 in the same year. Not less remarkable is the increase in the number of cases treated in the villages by itinerating Veterinary Assistants, the large total of 21,439 having been reached during the year, as against 7,346 in the year 1901-1902. Seven additional itinerant Veterinary Assistants were appointed during the year under review, but the demand for qualified men exceeded the supply, and the requisitions of several districts could not be complied with. Although it is disappointing that a sufficient number of Assistants were not available for pressing needs during the year, it must be remembered that the Department is young, while the fact that more Assistants are required than can be supplied is no small testimony to the thoroughness of the training imparted at the Veterinary College.

3. *Epidemic Diseases.*—During the year 57 animals were admitted into the Belgachia Contagious Diseases Hospital, as against 33 in the year 1901-1902; of these, 51, which were found to be suffering from glanders, either were destroyed or died of the disease. Besides these cases, the Superintendent of the Veterinary Department reports that no less than 319 animals were found to be suffering from this malady at the Sodepore Pinjrapole, which receives nearly all its inmates from Calcutta. As mentioned in last year's report, the introduction of the Glanders and Farcy Act, XIII of 1899, into Calcutta, owing to the heavy increase of expenditure involved, has had to be deferred pending the revision of the Provincial contract. The figures quoted above show that glanders is rife in Calcutta, and indicate that the introduction of the Act is a contingency which must be provided for in the near future.

4. The number of cases of cattle-disease reported in the districts shows a slight decrease in comparison with the figures of the previous year, but there were severe outbreaks of rinderpest in Khulna, Backergunge and Palamau, in each of which districts the number of cattle attacked exceeded 4,000. Owing to the inadequacy of the staff, mention of which has been made in paragraph 2 of the Resolution, the number of cattle immunised during the year was smaller than in the preceding year, the total number operated upon having been 11,472, as against 12,829 in the year 1901-1902. The Lieutenant-Governor again observes with satisfaction the absence of all friction between the operators and the owners of the cattle immunised. Instruction

in rinderpest inoculation was given during the year at Muktesar to 23 Veterinary Assistants, who were all passed by the Imperial Bacteriologist as duly qualified.

5. *Improvement of Stock.*—The Government of India, in commenting on last year's report, discouraged the introduction of foreign stock and directed that the efforts of the Department should be specially directed towards the improvement of indigenous breeds of cattle. These orders are being borne in mind, and in the instructions issued to the Judging Committees at the various local fairs, great stress is laid upon the importance of encouraging local breeding and the improvement of indigenous stock.

6. *The Veterinary College.*—Thirty students prosecuted their studies throughout the year in the three classes of the College: of these, all but two were successful at the annual and final examinations. These results reflect the greatest credit on the Principal and his staff.

7. *Belgachia Infirmary.*—The total number of cases treated in the infirmary during the year was 2,385, showing an increase of 427 over the figures of the previous year; while 623 operations were performed, as against 473 in the year 1900-1901. It is satisfactory to observe that the reduction of fees, which was made last year with the object of encouraging the poorer classes to avail themselves of the benefits of the infirmary, resulted in a large increase in the number of horses and cattle treated as in-patients. A special grant of Rs. 29,765 was sanctioned during the year by the late Lieutenant-Governor in order to provide much-needed additional accommodation in the hospital: the new buildings were under construction at the close of the year.

8. *Financial.*—The Provincial cost of the Department exceeded that of last year by nearly Rs. 13,000. The increase was mainly caused by an increase in the cost of feeding, due to the admission of a larger number of animals at lower rates. The sum of Rs. 2,500, shown by the Superintendent of the Veterinary Department in Table XVIII, attached to the Report, as expenditure on prizes at fairs and shows, is an Imperial charge, and has been erroneously entered by him in the statement referred to. This amount has, accordingly, been omitted in calculating the Provincial cost.

9. The Lieutenant-Governor has much pleasure in acknowledging the zeal and ability with which Veterinary-Major Raymond continued to manage the Department during the year.

By order of the Lieutenant-Governor of Bengal,

A. EARLE,

Offg. Secretary to the Govt. of Bengal.

Hose-carts with 400 feet of hose are also kept at the Sukea's Street, Fenwick Bazar, Jora Bagan, Coomertolly, and Alipore police-stations for emergencies.

3. A statement showing the receipts and expenditure of the fire-brigade is annexed to this report. The year opened with a balance of Rs. 17,945-15-11, the receipts amounted to Rs. 84,820-11-4, and the total expenditure to Rs. 78,881-2-11, leaving a balance of Rs. 23,885-8-4 at the close of the year.

Receipts.—Fees under the Petroleum Act realised Rs. 407, as against the estimate of Rs. 700. Under the head "Fines" there was an increase of Rs. 100. The sale-proceeds of horses amounted to Rs. 550. The net result was an actual increase of Rs. 283-11-4 over the estimates.

Expenditure.—The small increase under the head "Establishment" was due to the grant of grain compensation allowance not provided for in the budget, and the decrease represents savings due to vacancies in the rank of khalasis. Under the head "Contingencies" there were savings chiefly under the following heads:—Feed and keep of horses Rs. 997-8, the price of food stuff being low during the year, Rs. 645-7-6 under the head "Clothing," owing to some articles not having been supplied within the year, Rs. 700 under "Purchase of hand-cart," Rs. 1,033-10-9 under "Purchase of horses," and Rs. 1,286-6-8 under "Rent of telephone lines," as bills for the last quarter were not received within the year. Thus the total savings were Rs. 4,663-0-11 under this head. Under the head "Other charges," the sum of Rs. 1,500 due to the Calcutta Corporation on account of cost of collection of warehouse fees for 1901-1902, which was shown as undisbursed in last year's report, was claimed

and paid for during 1902-1903, hence the increase. The large opening balance together with the net savings of Rs. 4,155-13-1, as shown in the statement, accounts for the large closing balance. In the budget estimate for 1903-1904, the anticipated balance at the close of the year under report was estimated at Rs. 17,983, and this sum, out of the actual closing balance of Rs. 23,885-8-4, has been taken as a set off in determining the contributions payable by the several municipalities during the current year.

4. The following table gives the number of fires and the way they were dealt with :—

Description of fire.	Number of fires.	Number of fires attended by Fire-brigade.	Number of fires extinguished by residents.	Number of fires attended by Port Fire Engines.
1	2	3	4	5
Fires at which property destroyed valued at Rs. 50 or more	43	28	8	7*
Fires at which property destroyed valued at less than Rs. 50	72	16	56	......

* Fire-brigade also attended at five of these fires.

5. Six of these fires occurred in buildings licensed under Act I of 1893 and Act I of 1894 in which property to the total value of Rs. 18,59,340 was destroyed.

6. The total estimated value of the property destroyed by fire was Rs. 20,76,576-8 against Rs. 9,17,632-8, the value of the property destroyed in 1901-1902.

7. Four lives were lost during the year at fires, viz., a child aged eleven years, who was slightly burnt in a fire at Choonapooker Lane in Section I town, on 20th June 1902, died at his house on the following day, a boy aged fourteen years, who was severely burnt in a fire, which took place on the 28th October 1902 at Upper Chitpur Road in Section F town, died the same day, and two men died from injuries received at a fire at Messrs. Ralli Brothers' Jute Press in Chitpur on the 25th February 1903, one at the spot, and the other at his house the same night.

8. The following were the most serious fires :—

On the 3rd November 1902.—The flat *Josephine* containing jute and mustard seed, caught fire off Salkea Ghât. The fire lasted five hours and forty-five minutes, and was extinguished by the Port Commissioners' fire-float *Hetty*. Loss estimated at Rs. 35,000.

On the 18th November 1902.—Fourteen thatched-roof sheds, containing 20,000 maunds of jute, caught fire at Domjoor in Howrah. The fire lasted for 13 hours. The steam-engine *Damooda* worked there at the request of the District Superintendent of Police, Howrah, the place being out of the jurisdiction of the Howrah Municipal limits. Loss estimated at Rs. 1,50,000.

On the 28th November 1902.—Messrs. Ralli Brothers' Jute Press in a pucka two-storied building, measuring 200 feet × 100 feet × 28 feet, containing jute in bales and drums, caught fire at Ramgopal Ghose's Lane, Chitpur. The fire lasted for forty-nine hours, and was extinguished by the Calcutta Fire-Brigade and the Port Commissioners' fire-float *Hetty*. Loss estimated at Rs. 5,50,000.

On the 25th February 1903.—Messrs. Ralli Brothers' Jute Press in a large two-storied pucka building, containing 12 hydraulic jute presses and jute in bales and drums caught fire at Ramgopal Ghose's Lane, Chitpur. The fire lasted up to 9-30 A.M. of the 1st March 1903, and was extinguished by the Calcutta Fire-Brigade and the Port Commissioners' fire-floats *Hooghly* and *Hetty*. Loss estimated at Rs. 13,00,000.

On the 31st March 1903.—One large corrugated-iron godown, containing 416,132 cases of kerosine-oil, at Budge-Budge, caught fire. Loss estimated at Rs. 16,58,262. This fire occurred beyond the jurisdiction of the Calcutta Fire-Brigade, but within the limits of the Calcutta Port. The fire burnt itself out after lasting for a fortnight.

9. Four licenses were granted under section 36, Act I of 1893, for letting off fire-works, rockets, &c. None of the licenses were suspended under section 37 of the Act.

10. Eleven prosecutions were instituted under Act IV of 1884 for manufacturing fire-works without licenses; in all the cases the accused were convicted and fined.

CALCUTTA,

The 24th June 1903.

R. A. D'O. BIGNELL,

Commissioner of Police.

REPORT ON THE ADMINISTRATION OF THE SALT DEPARTMENT IN BENGAL DURING THE YEAR 1902-1903.

The 8th August 1903.—The following extracts from the Report of the Board of Revenue on the Administration of the Salt Department in the Lower Provinces during the year 1902-1903 are published for general information.

L. P. SHIRRES,
Secy. to the Govt. of Bengal.

No. 6393B., dated Calcutta, the 22nd July 1903.
From—H. WHEELER, Esq., Secretary to the Board of Revenue, L. P.,
To—The Secretary to the Government of Bengal, Financial Department.

CHAPTER I.—PRELIMINARY.

Reduction of duty.

2. The most important incident of the year occurred towards its close and it is as yet too early to pronounce upon its effect. On and after the 18th March 1903 the rate of duty upon salt manufactured in any part of British India (other than Burma, certain mines in the Kohat district, and Aden) or imported by land into any part of British India (other than Burma) was reduced from Rs. 2-8 to Rs. 2 on each maund of 82$\frac{2}{7}$ lbs. Apart from the obvious result of a diminution of revenue likely to ensue, it will be of interest during the current year to watch the effect of this measure upon the course of prices, the rate of consumption, and the prevalence of illicit manufacture.

3. * * * * *

Administration.

There were several changes in the area under the supervision of preventive operations. In the district of Backergunge where operations had been commenced in December 1900, and where the staff had worked for two seasons in the saliferous area, the force was disbanded in June 1902, as the prevalence of illicit practices did not appear to be such as to justify its retention. The Inspector whose services were thus rendered available was deputed to the district of Noakhali to examine the evidence as to the existence there of the illicit manufacture of salt and to report on the establishment required in order to undertake preventive measures in the district. The result of his enquiries was to demonstrate that there was scope for a small special patrolling staff, and its entertainment is under consideration.

In Chittagong, the staff was reinforced by the addition of the same Inspector on the completion of his investigation in Noakhali, and it was thereby found possible to constitute a fourth range with its head-quarters at Chakaria towards the close of the year. The four ranges were grouped in two circles, each under an Inspector, and it is anticipated that a considerable improvement in administration will be thus effected. The results of the preventive operations in this district have hitherto given good promise of success, but the inadequacy of the staff working there has so far been a difficulty.

The Factory Circle in Puri was abolished on the 23rd May 1902, on which date the Tua Factory was closed. The preventive operations in the district continued as before.

In their letter No. 1336B., dated the 17th February 1903, the Board submitted their report upon the success which had attended the measures sanctioned in the Secretary of State's Despatch No. 223(Revenue), dated the 19th October 1899, in securing or increasing the revenue, and after the close of the year, their proposals for the reorganization of the Department with the object of placing the operations in each district under the control of the Magistrate-Collector with a view to its greater efficiency and more extended action, were communicated to Government with their letter No. 4048B., dated the 13th May 1903.

Special Police head-constables.

4. Under the orders of Government, No 1114T.—F., dated the 11th July 1902, the special police force entertained in the district of Midnapore for the prevention of offences against the Salt Law was abolished, and nine head-constables were employed in its place to accompany the patrol parties in the course of house-searches. An additional head constable whose appointment was sanctioned in Government order No. 1987T.—F., dated the 18th October 1902, was employed for the same purpose in the new range in Chittagong. A question having been raised as to the legality of searches for contraband salt conducted with the assistance of head-constables travelling with a salt party outside the area of the station to which they were attached, Government in its orders No. 5728S.R., dated the 13th December 1902, to the Inspector General of Police, Bengal, appointed such special head-constables to act as police officers in the specified areas in which they may be employed. These areas are being fixed according to the requirements of each preventive party in each district.

Wastage allowance on salt stored in inland bonded warehouses.

5. After consulting the Bengal Chamber of Commerce and the Collector of Customs, Calcutta, on the subject of the allowance for the wastage on salt during transit to, and storage in, inland bonded warehouses, the Board submitted the report referred to in paragraph 5 of their review of the operations of the preceding year, and it is at present under the consideration of Government. Measures for the enforcement of a closer supervision over the management of these inland *golas* were also considered during the year and certain suggestions for the amendment of the rules were offered which have since been approved by Government.

Minor changes.

6. The premises occupied or owned by the Calcutta Port Trust at the Kidderpore Docks and the waterways, quays, and warehouses included therein, were excluded during the year from the Salt Law limits. No change in the existing practice was thereby effected, but what had apparently been a legal omission was rectified.

New pass-stations at Khulna in the district of Khulna, and at Kaukhali, an outpost subordinate to the Perojpur police-station in the district of Backergunge, were established, the former during the year under report and the latter shortly after its close.

CHAPTER II.—STOCKS, IMPORTS, MANUFACTURES AND CLEARANCES.

7. * * * * *

Accounts of stocks and issues.

The stocks of salt held at the commencement of the year in all *golas*, both public and private, amounted to more than 36 lakhs of maunds, or over 23 lakhs of maunds in excess of the same figure for the preceding year during which importations had been unusually heavy. The quantity of salt imported during the year under report showed a decline of nearly 28 lakhs of maunds, although it totalled over one crore and 6 lakhs of maunds and was still considerably in excess of the importations during 1900-1901. The clearances were larger than in either of the two preceding years and amounted to over one crore and 13 lakhs of maunds. After allowing for wastage, the closing balance stood at 27,53,786 maunds. At the close of the year, there were 3,50,184 maunds of salt lying afloat in ships in the Port of Calcutta against 2,06,049 maunds at the end of 1901-1902.

It appears that the existence of the large stocks in the *golas* at the close of the previous year induced a general slackness in the import trade during the year under report. The percentage of the total importations which was bonded in the Sulkea and Kidderpore Dock *golas* continued to increase steadily and amounted to 71 per cent. during 1902-1903, as against 65 per cent. in the previous year. No serious difficulty was, however, experienced in providing the bonding space required by the trade, as the clearances from bond were heavy. Temporary partitions were erected during the year in the large *golas* at Sulkea and some extra space was thus obtained, while the

permanent subdivision of 23 *golas* by masonry walls has been since approved. Such expedients, however, afford a partial remedy only, and the need of additional accommodation on a more extensive scale is under consideration. The fluctuations of the trade lend an ever-changing element to the question and it is difficult to gauge the fairly constant demand to meet which storage space should be provided, but there are grounds for supposing that arrangements for further warehouse room will shortly become inevitable.

8. * * * * *

Imports.

There was a decrease of 22·7 per cent in the importations into Calcutta during the year. Nearly half of the total imports came from the United Kingdom, but English salt is being slowly, but steadily, replaced by salt imported from Aden and the Red Sea. Thus, as compared with 1898-99, when the quantity imported was about the same as during the year under review, the imports from the United Kingdom have decreased by nearly 10 lakhs of maunds, whereas those from Aden and the Red Sea have increased by over 12 lakhs of maunds. The steady decrease in the imports from the Persian Gulf Ports is ascribed to the gradual disappearance of the Arab sailing ships.

The importations into Chittagong again advanced by 76·9 per cent. compared with those of the previous year, in continuation of an advance of 70 per cent. during 1901-1902 in comparison with 1900-1901. The increase is attributed to larger demands from the adjacent districts owing to the facilities given by rail and boat.

9. * * * * *

Sales of imported salt from shipboard and bond.

There was an increase of 5·4 per cent. in the sales of imported salt, of which 19 per cent. was sold from shipboard and 81 per cent. from bond. The corresponding proportions in the preceding year were 32 and 68 per cent. In Calcutta there was a fall of 38 per cent. in the sales from the importing vessel direct, while there was an increase of 30 per cent. in the sales from bond. It would appear that the practice of bonding salt will gradually supersede the procedure of direct sale from shipboard. This result necessarily follows from the supersession of sailing vessels by steam. Of the boats carrying salt to Calcutta during the year, 94 per cent. were steamers.

Transactions in the Sulkea and Kidderpore Dock *golas*.

10. The total turn-over at the Sulkea and Kidderpore Dock *golas* for the past five years is shown below:—

	Mds.
1898-99 ...	1,08,34,957
1899-1900 ...	1,13,87,469
1900-1901 ...	1,21,04,343
1901-1902 ...	1,49,52,131
1902-1903 ...	1,54,83,932

There was an increase of over 5 lakhs of maunds in the amount of salt handled at the *golas*, notwithstanding a decrease of about 30 lakhs of maunds in the total importations. The figures testify to the popularity of the *golas*.

The turn-over at Sulkea was 1,04,09,921 maunds, against 99,70,762 maunds in the preceding year. At the Dock *golas* it was 50,74,011 maunds in comparison with 49,81,369 maunds.

* * * * *

Inland bonded warehouses.

12. Four additional private warehouses were licensed during the year; three in the name of Babu Jagarnath Goberdhan Das (one in the town of Dacca and two at Narayanganj in the district of Dacca) and one in favour of Babu Gobinda Chandra Shaha, at Madaripur in the district of Faridpur. The two warehouses opened by Babu Jagarnath Goberdhan Das at Narayanganj and one belonging to Messrs. Turner, Morrison & Co. at the same place were, however, closed during the year, thus leaving 22 warehouses in all open at the close of the year.

The quantity of salt despatched to these inland bonded warehouses from shipboard and from bond in Calcutta amounted to 12,58,769 maunds, as compared with 13,53,091 maunds during 1901-1902, a decrease of nearly 7 per cent. There was thus a check in the volume of the consignments to these warehouses, but it is to be noted that the preceding year had shown an increase of over 29 per cent. as compared with 1900-1901.

* *

Imports of Madras salt into Orissa.

16. The quantity of Madras *karkatch* and refined salt imported into Orissa from the different factories during the year was 8,28,823 maunds in comparison with 7,11,909 maunds in the previous year; the net increase was thus 1,16,914 maunds, or 16·4 per cent. The operations of the Oriental Salt Company from their factory at Naupada were pushed actively and were favoured by the exhaustion of the stocks of Lake salt. Thus, in Cuttack their sales rose from 1,55,722 maunds in 1901-1902 to 3,19,406 maunds during the year under review. In Puri, the sales of Madras salt from their factories and others, similarly rose from 52,970 to 95,659 maunds during 1902-1903.

The imports of Madras salt into the districts of Cuttack and Puri and the Tributary Mahals showed an aggregate increase of 1,50,954 maunds, though Balasore showed a decrease of 34,040 maunds, the net result being an increase of 1,16,914 maunds. The decrease in Balasore is attributed to the Oriental Salt Company having opened new depôts in the Kendrapara and Jajpore subdivisions in the district of Cuttack for the direct supply of Madras salt, whereas these places were formerly supplied from Chandbali.

There would seem to be a good future in Orissa for the sale of Madras salt and on the application of the Oriental Salt Company proposals were submitted to Government for the extension of the advantages of the inland bonded warehouse system to such importations. The law, as it stands at present, is applicable to salt imported by sea, only. Should this be done, a further impetus will be given to such sales which the opening of the East Coast Railway has already fostered.

CHAPTER III.—CONSUMPTION AND PRICES.

Consumption in Bengal.

17. The total quantity of salt which passed into consumption in the entire Province of Bengal during the year under review was 1,10,45,690 maunds. This is exclusive of 2,81,862 maunds, being the net exports by land, and inclusive of 16,847 maunds educed from saltpetre. In comparison with the preceding year the figures show an increase of 6,14,252 maunds, or 5·8 per cent. Of the total quantity the saliferous tracts (including the whole of Orissa) took 19,61,893 maunds, or 17·8 per cent. and the rest of the Province 90,83,797 maunds, or 82·2 per cent. The consumption per head in the saliferous tracts including Orissa was 5srs. 15chs. or 12·21 lbs., and in the rest of the Province, 5srs. 7chs. or 11·18 lbs. * * * * *
The figures are approximate only, but the corresponding averages during the preceding year having been 12·34 lbs. within the saliferous area and 10·67 lbs. in the rest of the Province, there was a slight falling off in consumption in the former and a fair degree of improvement in the latter.

The rates of consumption per head of population in the Bombay and Madras Presidencies during 1901-1902 were 10·71 lbs. and 16·02 lbs. respectively.

18. * * * * *

Consumption of salt within the Salt Law limits.

During the year under report the consumption of salt within the Salt Law area rose by 42,797 maunds in continuation of an increase of 15,902 maunds in 1901-1902 compared with its predecessor. The consumption per head showed a small decline in the districts of Howrah and Khulna. In the former illicit practices are known to prevail, and a proper establishment for their prevention has hitherto been wanting. In the district of Khulna, the existing preventive staff has never been sufficiently strong to overcome the physical difficulties of supervision or the antagonistic attitude of the people. Proposals which will render

possible more stringent measures in both districts have been submitted to Government. The results achieved in Chittagong were satisfactory.

From special enquiries made in the district of Noakhali to which attention was drawn in the Board's report on the operations of the preceding year, it appeared that the low rate of average consumption per head in that district during 1901-1902, was in the main due to the unregistered importation of licit salt into the protected area. It will be seen, however, that the figures for 1902-1903 evidence some improvement. The only district which for the last two years has failed to show an average consumption per head of five seers or more, is Midnapore, and although there has been a slight improvement during the year under review, the Board consider that there is still scope for more energetic preventive action.

* * * * *

Consumption of salt in the town of Calcutta.

21. The quantity of salt consumed in the town of Calcutta during the years 1901-1902 and 1902-1903 amounted to 1,35,399 maunds and 1,52,373 maunds respectively, giving an average annual consumption of six seers and six chitaks, and seven seers and one chitak respectively, or of 13 and 14 pounds approximately per head of the population calculated on the census figures of 1901 plus the usual allowance for annual increase.

Prices of salt in Bengal generally.

22. * * * * The prices during the year under report were lower than in the preceding year in all districts, except seven (Birbhum, Howrah, Muzaffarpur, Monghyr, Purnea, Puri, and Singhbhum). It was only, however, in Singhbhum that the increase of price was particularly noticeable, and it is there attributed to the larger sales of the more expensive *panga* salt in place of the cheaper *karkatch* variety previously consumed. The divisional averages fell in all cases, and the average wholesale price for the whole Province was Rs. 3-10-9 per maund as compared with Rs. 3-12-8 in 1901-1902, showing a fall of about two annas. Except at Muzaffarpur (where, however, the rise was small), the average price of salt per maund in the principal provincial bazars was lower than in the preceding year. The average for the twelve marts for which figures are quoted was Rs. 3-9-2 against Rs. 3-11-9 in 1901-1902, being a decrease of two annas seven pies per maund.

The average wholesale price of Liverpool salt per hundred maunds as sold from the ship's side in the port of Calcutta, exclusive of duty, amounted to Rs. 56-3-9, as compared with Rs. 69-11-5 in 1901-1902, a decrease of Rs. 13-7-8. The fall in price is ascribed to the large stocks in hand and to the general depression in the trade. The selling price of Liverpool salt per hundred maunds, exclusive of duty, which in 1901-1902 varied from Rs. 70-5-8 to Rs. 57-4-6, ranged in the year under report from Rs. 64-10-8 to Rs. 47-8-8.

CHAPTER IV.—PREVENTIVE MEASURES.

Preventive operations in the saliferous districts.

23. Operations for the prevention of illicit manufacture of salt were carried on, as in previous years, in the districts of the 24-Parganas, Midnapore, Khulna, Chittagong, and of the Orissa Division. Howrah, in so far as it was dealt with at all, continued to be worked by a small party under the Inspector of the Tamluk circle, in the district of Midnapore, under the immediate supervision and control of the Assistant Commissioner. Mention has already been made of the cessation of preventive operations in Backergunge.

Attachments, releases and confiscations in the saliferous districts, including Orissa.

24. During the year under review, illicit salt was attached, released, and confiscated in 1,163, 5 and 887 cases respectively, as against 929, 12 and 908 in the previous year, to the extent of 261, 85 and 156 maunds against 684, 546 and 150 maunds during the year 1901-1902. There was thus a decrease of 423 maunds, or 61·8 per cent., in the quantity attached, and an increase of 6 maunds, or 4 per cent., in the quantity confiscated. On an average about 9 seers of salt were attached and 7 seers confiscated in each case, as against 29½ seers and 6¾ seers, respectively, in 1901-1902.

Number of seizures and unsuccessful searches.

25. The number of seizures and unsuccessful house-searches during the year under review was 1,228 and 12, respectively, as against 1,491 and 42 in the previous year. There were no unsuccessful house-searches in the districts of Puri, the 24-Parganas, Khulna and Howrah, while in the districts of Balasore, Cuttack, Midnapore and Chittagong the number of such searches was very small in comparison with the number of seizures effected. The general percentage of unsuccessful house-searches to seizures is also inconsiderable being only ·97 against 2·81 in the previous year.

26. * * * * * *

Number of cases instituted under Acts VII (B.C.) of 1864 and XII of 1882.

There were 813 prosecutions during the year, against 1,238 in 1901-1902: out of 1,017 persons arrested and brought to trial, 817 were convicted, showing a percentage of 80. Cases of illicit manufacture of salt (section 9, Act XII of 1882) numbered 673, as compared with 953 in the previous year. The proportion of persons convicted of this offence was 79 per cent. of those brought to trial. The decrease in the number of cases chiefly took place in the districts marginally noted, all of which during the preceding year had shown a still larger increase in comparison with the year 1900-1901. In the 24-Parganas the decrease is attributed to the diminution of crime owing to the success of the preventive operations, and to the unfavourable character of the manufacturing season during which frequent thunderstorms repeatedly destroyed the efflorescence and rendered the soil unfit for scraping. The decrease in Balasore is reported to be due to a decrease in crime. In Puri it is ascribed partly to the prosperous condition of the cultivating class, who are as a rule driven to the manufacture of salt only on failure of their crops, and partly, as in the 24-Parganas, to the rains that fell during the year, both before and after the monsoon, far into the salt manufacturing season. There was no case of the possession of spontaneous or swamp salt during the year. It is reported that 27 cases in the 24-Parganas, 35 cases in Midnapore and 10 cases in Puri were lost, owing to the failure of police officers to attend house-searches. The cases were brought to the notice of the Magistrates concerned, and the police officers were suitably dealt with. During the year 31 opium cases were detected by the salt officers as against 39 in the previous year. A ganja case under the Excise Act was reported by the salt officers in Chittagong.

24-Parganas	175
Balasore	66
Puri	88

It is reported that except in certain saline areas in the district of Balasore, where the crops were below the average owing to the failure of the rains, the state of the harvests and the condition of the people were good.

Fines, forfeitures and rewards.

27. The fines and forfeitures realised during the year amounted to Rs. 7,689-0-5, while Rs. 6,567-10-8 were disbursed as rewards, as compared with Rs. 9,703-13-6 and Rs. 10,169-8-7 realised and disbursed during 1901-1902.

CHAPTER V.—FINANCIAL RESULTS.

29. * * * * *

Receipts and charges.

The results of the year, as compared with those of 1901-1902, show an increase of Rs. 7,70,656, or 2·9 per cent., in the receipts and a decrease of Rs. 77,023, or 14·8 per cent., in the charges, giving a net revenue of Rs. 2,63,61,090, which is in excess of that obtained during 1901-1902 by Rs. 8,47,679, or 3·3 per cent. The increase in receipts occurs mainly under the two heads of the Import Duty on Salt and Rent of Warehouses; the former was due to the heavier clearances from bond owing to a falling off in the importations, and the latter to the larger stocks of salt in the *golas* throughout the year. There was a marked fall in the excise duty on salt owing to the exhaustion of the stocks of Lake salt in Orissa.

30. There was an increase of Rs. 17,046 in the charges under the head "Salaries, Warehouses and Rewards" and a decrease of Rs. 84,341 under that of "Refunds of Customs Duty on Salt." * * * * * * . The sub-heads "Salaries of Establishment" and "Rents, Rates and Taxes" were mainly responsible for the increase; the

charges on account of establishment were raised by the opening of new bonded salt warehouses, * * , and to an increase in the overtime fees paid at Chittagong and in the pay of the menials at the Sulkea *golas*. The increase under the head "Rents, Rates and Taxes" was due to the higher rents paid to the Port Commissioners for the larger stocks stored in the Dock *golas* and to the larger payments to the Municipality owing to the increase in the number of *golas* occupied at Sulkea. The sub-heads "Rewards to Informers" and "Petty Construction and Repairs" showed a decrease. The former was attributable to the fewer cases sent up by the police at Chittagong.

* * * * *

* * * . The charges during the year under report, amounted in all to Rs. 2,20,363, against Rs. 2,20,904 in the previous year, showing a decrease of Rs. 541, or ·2 per cent.

Charges of the Bengal Salt Department.

* * * * *

36. The quantity of salt educed in the manufacture of saltpetre and removed from all the refineries in the Province on payment of duty during the year was 16,847 maunds as compared with 17,974 maunds similarly removed in 1901-1902.

Trade in saltpetre.

37. In the beginning of the year there were five saltpetre refineries at work in Calcutta and its environs, of which the licenses remained in force up to the 31st July 1902. In August the licenses of four refiners were renewed—two for refining saltpetre and the remaining two for refining saltpetre and educing salt therefrom. These refineries are situated, one at Soorah, two at Kakurgachi, and one at Ultadingi.

Saltpetre refineries in and about Calcutta.

The quantity of refined saltpetre produced was 44,903 maunds in comparison with 50,571 maunds, and the quantity of salt educed was 2,588 maunds against 5,594 maunds in 1901-1902. The quantity of salt excised was 1,201 maunds against 3,040* maunds in the preceding year. Educed salt is used locally in the manufacture of soap and for freezing purposes. In previous years a small quantity used to be exported to Burdwan, but for reasons unknown, this exportation has ceased.

The total receipts from license fees and duty amounted to Rs. 3,162 against Rs. 7,850 in 1901-1902, showing a decrease of Rs. 4,688, which is attributed to the general depression in the trade. The decline is reported by the Assistant Commissioner to be due to the fact that in former years Bihar used to manufacture only *crude* saltpetre, which came down to Calcutta in order to be refined for export. Bihar has now commenced to refine its *crude* saltpetre; and in consequence of the cost of labour and of fuel being less in that part of the country than in Calcutta, the Bihar refiners are able to compete successfully.

38. In the 24-Parganas, no survey was made of the saline tracts in the Diamond Harbour and Matla circles. In the Sundarbans circle, out of 25 lots, four villages and three islands, remaining to be surveyed at the end of the previous year, seven lots only were surveyed during the year. The insufficient progress made in the work is reported to be due to the frequent resignations of the officers employed. In the Midnapore district 18 villages out of 1,300 in the Tamluk circle and 20 villages out of 1,691 in the Contai circle were surveyed during the year by the regular staff of inspecting and detective officers of the district. No survey of saline areas was undertaken during the year in the district of Chittagong. The subject of surveying saline tracts has engaged the attention of the Commissioner of Salt, and the officers concerned have been directed to push on the work as fast as they can with the existing staff.

Survey of salt tracts.

46. Mr. T. Inglis was in charge of the office of the Commissioner of Excise and Salt throughout the year, and the Board desire to recognise his services. The Board's thanks are also due to Mr. L. F. Morshead, the Collector of Customs, Calcutta, and to Mr. A. S. Judge, Superintendent of the Preventive Service and Salt *Golas*, Calcutta, for their work during the year.

ANNUAL REPORT OF THE MARINE DEPARTMENT FOR 1902-1903.

No. 1294Marine.

Government of Bengal.

MARINE DEPARTMENT.

Dated Calcutta, the 7th August 1903.

RESOLUTION.

READ—

Letter No. 2723, dated the 21st July 1903, from the Port Officer, Calcutta, submitting the Annual Report of his Department for the year 1902-1903.

AT the commencement of the year, the number of Pilots on the list was 49, or 3 short of the sanctioned number of 52. At the close of the year the number stood the same.

2. The number of vessels that arrived at the port during the year was 1,310, and of those that sailed from it 1,303, the total number of arrivals and departures having thus been 2,613, or 90 less than that of the previous year.

These figures represent a gross tonnage of 4,543,340 inwards and 4,514,004 outwards. The average tonnage of steam and sailing vessels, inwards and outwards, was 3,466, against 3,401 of the previous year.

3. The pilotage receipts during the year amounted to Rs. 11,53,222, against Rs. 11,30,598 during the previous year. Of the total number of vessels which visited the port, only 30 were sailing vessels.

4. Ten vessels were neaped for want of sufficient depth of water over the bars, against nine during the previous year. The average detention was 3·4 days. It is also reported that many vessels left short of cargo to avoid detention. The number of vessels detained at the Sandheads for want of Pilots was 17, compared with 24 in the previous year. The shortest detention was for 6 hours and the longest for 35 hours and 30 minutes. The average detention was for 18 hours and 33 minutes. The longest detention was due to a south-west gale; the others were due to a number of vessels arriving at the same time.

5. There were three collisions during the year, while the number of groundings was 18. In two cases of collision the Pilots concerned were to blame, while in respect to the groundings, the Pilots were held to blame in six instances.

6. Thirty-two preliminary enquiries into casualties to vessels were held by the Port Officer, of which six were referred to Special Courts of Enquiry. A further Special Court of Enquiry was held to enquire into the cause of an accident to a vessel while in charge of a Harbour Master. In nine cases the Pilots were held to blame, and they were suitably dealt with.

7. One hundred and twenty-six candidates appeared at the examinations for Colonial and Home Trade certificates of competency, of whom 73 passed. One hundred and thirty-one candidates also appeared at the different examinations for certificates of competency as Masters, Serangs, Engineers, and Engine-drivers under Act VI of 1884. Of these, 54 passed.

8. Mr. G. Robertson performed the duties of First Engineer and Shipwright-Surveyor throughout the year, while Mr. F. Olford performed the duties of Second Engineer and Shipwright-Surveyor. The gross receipts from surveys amounted to Rs. 39,588.

9. The work of the Department was conducted by Commander E. J. Beaumont, R.I.M., throughout the year. Lieutenant W. B. Huddleston, R.I.M., Assistant Port Officer and Deputy Shipping Master, reverted to the Royal Indian Marine on proceeding to England on one year's leave from the 1st October 1902, making over charge of his duties to Lieutenant C. B. Henley, R.I.M.

By order of the Lieutenant-Governor of Bengal,

W. A. INGLIS,

Offg. Secy. to the Govt. of Bengal.

Prospects very little and gloomy. Water sufficient. Fodder scarce in some places. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	14	per rupee.
Begusarai	11	0

In Sadar and Banka subdivisions, rain has saved late sown *makai* for present, but has come too late for early *makai*. It has enabled cultivators to plough for transplantation of paddy, but has only been sufficient to enable transplantation to begin in a small area round Banka. Heavy rain at an early date is urgently needed. The condition of seedlings has improved. Crops are doing well in thanas Madhipura and Kishanganj. But rain urgently needed in thana Bangaon and in Supaul subdivision to enable transplantation to be completed. It is at present stopped for want of rain. Fodder and water sufficient. Prospects of early *bhadoi* crops are moderate; they are backward, but not seriously injured. Fodder sufficient. Water still scarce. Generally speaking crops are good in the south of the district, but suffering somewhat in the north. Common rice sells at 11 seers per rupee.

Ranchi.—Rainfall at Sadar 2·97. Weather cloudy. State of standing crops good. Transplantation of paddy continues, but more rain is wanted. Cattle-disease reported from four thanas. Fodder and water sufficient. Common rice sells at Sadar at 11 seers and at Gumla at 16 seers per rupee.

Palamau.—Rainfall at Sadar 1·55. Weather hot and cloudy. Though small at Sadar, heavy falls of 5 and 6 inches were recorded in the district. Prospects of *bhadoi* crops enormously improved; but owing to comparatively local character of rain, their condition is not uniform : 8 to 10-anna crop may still be hoped for. Transplantation of winter rice begun in about 90 per cent. of the villages. If good rain recurs in 10 days, 12-anna rice crop is still possible. Cattle-disease continues. Prices have risen greatly. Common rice sells at 10 seers 2 chitaks and maize 16 seers 14 chitaks per rupee. They will fall if rain again comes.

General Summary.—Rainfall during the week was general but unequally distributed and, in some districts very insufficient. In Patna, Gaya, Shahabad, Saran, and Palamau the prospects of the *bhadoi* crop are much improved, but more rain is still urgently needed for the winter rice crop. Standing crops in Monghyr and Bhagalpur have benefited by the recent rain, but transplantation is retarded for want of more rain. Most of the districts urgently require more rain; prospects generally have improved, but are still unfavourable. Cattle-disease reported from 12 districts. Fodder and water generally sufficient. The price of common rice has risen in 18 districts, has fallen in 4, and is stationary in the remainder.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JULY 1903.

WEATHER conditions have been exceptional throughout the month, not only over the Province, but also in the north of the Bay. A consideration of the changes which occurred from day to day and of the temperature and rainfall distribution falls naturally into two periods, because of a disturbance which passed over the Province from north-east to south-west in the early part of the second week. Up to the time of that occurrence weather was similar to what obtained in June. That is ordinary monsoon weather prevailed in the east of the Province and in Assam with general and in places heavy rain and low temperature, while in the western districts there were still comparatively dry westerly winds and an almost entire absence of rainfall. At the beginning of the month the difference from normal temperature varied from excess of 8° at Dehri to defect of 3° in East Bengal.

Pressure oscillations continued unimportant during the first week, but temperature was rising steadily though slowly in the western districts, and the deficiency noticed at the beginning of the month in the eastern districts almost disappeared On the 6th and 7th mean excess in temperature varied from 10° in the west of Bihar to 1° in the eastern districts.

The important change began on the 8th, and was shown by a fall of pressure which appeared first in the north-east of the Province. It was general in Bengal on the 9th, on which date there was a more than usually steep gradient over Bengal with strong southerly winds. On the 10th this fall of pressure was followed by a brisk rise, which, like the previous fall, appeared to move in a direction roughly from north-east to south-west. On the 12th an area of low pressure was shown over the north of the Bay.

During these days, from the 8th to the 11th, while the above series of pressure changes were passing over Bengal, heavy rainfall, caused apparently to a large extent by thunderstorms, spread from Assam and North Bengal towards the south-western districts. Owing to the ordinary monsoon conditions during the early days of the month heavy rain had been falling in parts of North Bengal, but the 5th and 6th were comparatively dry days. On the 8th heavy rainfall became general and continued in the north-eastern districts until the 11th. Meanwhile the disturbance to which this rainfall was due was advancing in a south-westerly direction, and the rainfall which it caused is shown in the tables as occurring in Lower Bengal on the 11th and 12th and in Bihar on the 12th and 13th.

This rainfall, as has been already stated, was due to local storms and was accompanied by a rapid fall of temperature, which began in the north-east on the 9th, had extended further westward on the 10th, and was very marked over North Bengal on the 11th. On the 10th the difference from normal temperature varied from excess of 12° in the west of Bihar to defect of 2° to 3° in Assam, on the 11th it varied from excess of 8° in Chota Nagpur to defect of 7° in North Bengal, and on the 12th defect had extended to Bihar, while in the western districts the largest excess was 5° in Chota Nagpur.

These striking changes between the 9th and 11th were probably due to a stronger northerly element in the upper wind over Bengal; and the same wind appears to have initiated and maintained the formation of small cyclonic storms over the north-west angle of the Bay. Between the 12th, when the first depression began to form, and the end of the month, four depressions appeared at regular intervals of five days, so that the last of the series dated from the 27th. Throughout that period the lower winds in Bengal were almost continuously from the east; and although they changed to south and at times south-west for a short time between the breaking up of one depression and the commencement of the next, that interval was too short to allow any considerable advance of southerly winds into Bengal. The consequence was that rainfall was unusually light over a great part of the Province during the latter half of the month, and that the total rainfall for July was much below the normal in all parts except Orissa. That division and the adjacent parts of South-West Bengal and Chota Nagpur being more directly under the influence of the depressions received fairly copious rainfall, but Orissa alone shows excess.

During the last week rainfall almost entirely ceased in the west of Bihar, cloud to a large extent dissipated, and exceptionally high temperatures, up to 102°, were recorded. On the 31st mean excess varied from 5° to 10° over the greater part of South Bihar and in the west of North Bihar, but in other parts of the Province excess was only moderate, generally about 2°.

The depressions which formed in the north-west of the Bay during the latter half of the month were less regular than usual in their after-movement. They all moved westward into Orissa, but only the third moved further west in any well-defined form. The first two practically broke up over Orissa. The last in the early days of August recurved northwards into Bihar and the adjoining parts of the United Provinces. Showery weather was fairly

continuous in Bengal proper while the depressions were forming, but the showers being due to passing squalls were light and scattered.

Pressure was in moderate excess at the beginning of the month. It diminished steadily in the early days, and there was a considerable defect on the 9th and 10th, while the disturbance from the north was passing over the Province. Subsequently to the 12th when the first depression began there was almost continuous low pressure, any small excess which occurred being in the northern districts. Of the four depressions which developed over the north-west of the Bay, the only one which attained to more than moderate depth was the first on the 12th and 13th, when defect in the central area was ·25 inch. With the others defect was never more than ·15 inch.

Temperature was more frequently above than below the normal, but the variation was rarely large except in the western districts, where hot season temperatures were at times recorded. These were most marked at the beginning and again at the end of the month, excess in day temperatures being occasionally as much as 12°. Mean excess for the month in Bihar was 3°·4, in Chota Nagpur 2°·5, and in other parts of the Province between 1° and 1°·5.

Rainfall distribution throughout July was never such as obtains with a generally established monsoon. During the first ten days rainfall was largely confined to the eastern districts, where it was copious. In the west only light scattered showers were falling. After the important change occurred about the 10th and depressions began to form over the north-west of the Bay, the heavy rain ceased in the east and the light showers became general except in Orissa, where the depressions caused daily moderate to heavy rain. In Bihar, more especially in the western districts, rainfall was exceptionally light.

The total average fall for the whole of Bihar was only 4·2 inches, the normal for the month being 13 inches. The next lowest was South-West Bengal, which received 6 inches as compared with the normal 12. In Chota Nagpur the fall was 8·5 inches, nearly 6 inches in defect, and in North and East Bengal there was a large defect owing to the light scattered showers which after the change about the 10th continued during the remainder of the month. In Orissa moderate to heavy rainfall prevailed after the depressions began on the 12th, the average fall being 14 inches, 2·6 inches in excess.

It will be seen from the table given below that since the commencement of the present year rainfall in Bihar has been steadily below the normal, and that it has exceeded 50 per cent. of that amount only twice, in February when it was 62 per cent., and in June 80 per cent. The total for the seven months to the end of July is 50 per cent. of the normal in Bihar, about 70 per cent. in South-West Bengal and Chota Nagpur, about 80 per cent. in East and North Bengal and 95 per cent. in Orissa.

Full details of the rainfall in Bengal in all districts are given in the accompanying tables day by day throughout the month.

The following table gives a comparison of the falls in the various divisions during the month of July with the normal fall, the actual being given as a percentage of the normal fall. The table also shows the actual falls for each of the previous months of the year expressed in the same way, and the last column of the table shows the total of the falls of the past seven months of the year in each division expressed as a percentage of the normal fall :—

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

[Rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.]

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder.

Offg. Secy. to the Govt. of Bengal.

The 14th August 1903.

No. 100Marine.—In exercise of the power conferred by section 5 of the Indian Explosives Act, 1884, and in supersession of the rules sanctioned under the Notification of this Government No. 6Marine, dated the 10th January 1902, the Lieutenant-Governor is pleased, with the previous sanction of the Governor-General in Council, to make the following amended rules to regulate the transport and importation of explosives, other than those mentioned in section 14 of the Act, in the Port of Calcutta.

These rules are supplementary to the rules relating to the transport and importation of explosives made by the Governor-General in Council and published in Home Department Notification No. 5528, dated the 11th October 1901, and amended under Notifications Nos. 2336 and 2547, dated the 11th June and the 25th June 1903, respectively.

W. A. INGLIS,
Offg. Secy. to the Govt. of Bengal.

N.B.—"Explosive," as defined in section 4, Act IV of 1884, and as used in these rules—

(*a*) means gunpowder, nitro-glycerine, dynamite, gun-cotton, blasting powder, fulminate of mercury or of other metals, coloured fires, and every other substance, whether similar to those above mentioned or not, used or manufactured with a view to produce a practical effect by explosion or a pyrotechnic effect; and

(*b*) includes fog-signals, fireworks, fuzes, rockets, percussion caps, detonators, cartridges, ammunition of all descriptions and every adaptation or preparation of an explosive as above defined. It also includes any dangerous substance which may have been ordered by the Governor-General in Council, under section 17 of the Indian Explosives Act, 1884, to be deemed an explosive.

1. Except as is hereinafter provided for, no vessel shall have on board, within the limits of the port, any explosive, as defined in section 4, Act IV of 1884, except 15 lbs. of common gundowder in addition to 12 rockets and 12 blue-lights. All explosives which vessels are by this rule permitted to keep on board shall be stored in a copper magazine out of risk of fire and explosion.

All explosives which by this rule may be ordinarily retained on board vessels in port shall be discharged before a vessel is taken into dry dock.

2. All inward-bound vessels carrying explosives in excess of 15 lbs. of common gunpowder, in addition to 12 rockets and 12 blue-lights, are prohibited from proceeding above Budge-Budge, and the master of any vessel lying within the port which shall have on board any explosive in contravention of these rules shall be liable to a fine which may extend to the sum mentioned in clause (*a*) or clause (*b*), as the case may be, of the proviso to section 5 of the Indian Explosives Act, 1884.

3. Explosives of classes 1, 6 and 7, as laid down in the rules issued under Government of India Notification No. 5528, dated 11th October 1901, that is to say, gunpowder, ammunition and fireworks in excess of the quantity prescribed in Rules 1 and 2, shall be landed and deposited in the magazine at Moyapore.

4. For the convenience of vessels having ship's gunpowder on board, a properly constructed powder-boat will be always in attendance off the magazine for landing and shipping the powder. No charge will be made for the use of the boat for landing ship's powder, but the responsibility of the keeper in respect of the ship's powder shall not commence until it is landed on the bank, and shall cease as soon as it is shipped on board the boat. Every precaution will be taken to insure the safety of the powder while in the boat, but the landing and shipping shall be at the risk of the vessel.

5. Vessels bringing consignments of trade explosives shall be allowed the use of the magazine boat; but should passing vessels require the use of the boat to put out or take in ship's powder, such vessels shall be accommodated before the boat can be used to discharge explosives brought as cargo. The landing of such consignments, whether the station boats or private boats are employed, shall be at the risk and expense of the consignees of the explosives, and no liability shall be accepted for damage sustained while in course of landing or until the consignments are stored in the magazine.

6. Explosives specified in the first division, class 6 of the rules published under Government of India's Notification No. 5528, dated 11th October 1901, viz., safety cartridges, safety fuzes for blasting, railway fog-signals, percussion caps and, under certain conditions, fuzes for shells and tubes friction for guns brought as part of a general cargo and which have been placed on board the vessels while lying in dock at ports of shipment, may be brought into port and landed at the docks or jetties in accordance with the regulations prescribed in that behalf in the Port Commissioners' bye-laws.

The term "safety fuze" means a fuze for blasting which burns and does not explode, and which does not contain its own means of ignition, and which is of such strength and construction, and contains an explosive in such quantity, that the burning of such fuze will not communicate laterally with other like fuzes.

The expression "safety cartridges" means cartridges for small-arms of which the case can be extracted from the small-arm after firing, and which are so closed as to prevent any

explosion in one cartridge being communicated to other cartridges. The term also includes rifle-calibre machine-gun cartridges if they are of the above description, whether they are for use with machine-guns having chambers identical with those of rifles or with machine-guns which have special chambers.

The maximum diameter at which a small-arm or machine-gun cartridge can be accepted as "safety" is one inch.

7. In order to avoid unnecessary detention, masters of vessels requiring the use of the powder-boat shall hoist a flag at the fore-topmast head on coming in sight of the magazine as a signal to the keeper to have the boat and coolies in attendance.

8. Masters of vessels shall mark the names of their respective vessels on the barrels and packages of ships' gunpowder previously to their being landed; if not marked, they shall not be received by the magazine boat.

9. Explosives shall not be landed within the port or at Moyapore or Diamond Harbour at any time when artificial lights are required to be used, and no explosives shall be landed, received into, or delivered from, the magazine when artificial lights are required to be used.

10. The magazine-keeper shall give to the master of any vessel landing explosives at the magazine a receipt for the number of packages, and the magazine-keeper shall be accountable to such master for the re-delivery of such packages.

11. Before entering the limits of the port, the master of every vessel having explosives on board shall make and sign a declaration in writing that to his knowledge and belief there is not on board any explosive exceeding the quantity prescribed in these rules.

12. A clerk shall be always in attendance in the powder-boat, and shall receive from the master the declaration specified in the foregoing rule.

13. If any vessel shall be prevented, by stress of weather, or by being in distress from landing or depositing such explosives in excess of the quantity allowed as aforesaid, such vessel may be permitted to come up to the lower limits of the port, but shall not proceed above Matteabrooj Ghat, and the master of such vessel shall forthwith give notice to the Harbour Master of his having such explosives on board, and shall obey the Harbour Master's directions relating to the same.

14. Masters of vessels outward bound, who may require ship's gunpowder for their outward voyage, shall not take such powder on board in any part of the river above Budge-Budge, with the exception of a quantity not exceeding 15 lbs. of common gunpowder in addition to 12 rockets and 12 blue-lights.

15. CIVIL SERVICE COMMISSION,
17th June 1903.

REGULATIONS.

*** *The following Regulations, made by the Secretary of State for India in Council, are liable to alteration from year to year:—*

1. An Examination for admission to the Civil Service of India, open to all qualified persons, will be held in London in August of each year. The date of the Examination and the number of appointments to be made for each Province will be announced beforehand by the Civil Service Commissioners.

2. No person will be deemed qualified who shall not satisfy the Civil Service Commissioners—

(i) that he is a natural-born subject of His Majesty;

(ii) that he had attained the age of twenty-one, and had not attained the age of twenty-three, on the first day of the year in which the Examination is held;

[*N.B.—In the case of Natives of India it will be necessary for a Candidate to obtain a certificate of age and nationality issued under Notification of the Government of India, No. 2252, dated 21st August, 1888, as amended by Notification No. 404, dated 19th May, 1898, and signed, should he be a resident in British India, by the Secretary to Government of the Province, or the Commissioner of the Division, within which his family resides, or should he reside in a Native State, by the highest Political Officer accredited to the State in which his family resides.*]

(iii) that he has no disease, constitutional affection, or bodily infirmity unfitting him, or likely to unfit him, for the Civil Service of India;

(iv) that he is of good moral character.

3. Should the evidence upon the above points be *primâ facie* satisfactory to the Civil Service Commissioners, the Candidate, on payment of the prescribed fee, will be admitted to the Examination. The Commissioners may, however, in their discretion at any time prior to the grant of the Certificate of Qualification hereinafter referred to, institute such further inquiries as they may deem necessary; and if the result of such inquiries, in the case of any Candidate, should be unsatisfactory to them in any of the above respects, he will be ineligible for admission to the Civil Service of India, and, if already selected, will be removed from the position of a Probationer.

7. The Examination will be conducted on paper and *vivâ voce*, as may be deemed necessary.

8. A Candidate entitled to be deemed a selected Candidate, but declining to accept the nomination as such, which may be offered to him, will be disqualified for any subsequent competition.

In this Examination, as in the Open Competition, the merit of the Candidates examined will be estimated by marks (which will be subject to deductions in the same way as the marks assigned at the Open Competition), and the number set opposite to each subject denotes the greatest number of marks that can be obtained in respect of it. The Examination will be conducted on paper and *vivâ voce*, as may be deemed necessary. This Examination will be held at the close of the year of probation, and will be called the "*Final Examination.*"

If any Candidate is prevented by sickness or any other adequate cause from attending such examination, the Commissioners may, with the concurrence of the Secretary of State for India in Council, allow him to appear at the Final Examination to be held in the following year, or at a special examination.

10. The selected Candidates will also be tested during their probation as to their proficiency in Riding.

The examinations in Riding will be held as follows:—

(1) Shortly after the result of the Open Competitive Examination has been declared, or at such time or times as the Commissioners may appoint during the course of the probationary year.

(*a*) A Syllabus, defining the character of the Examination in the various subjects, may be obtained on application to the Secretary, Civil Service Commission, Burlington Gardens, London, W.

(*b*) No deduction will be made from the marks assigned to Candidates in Mathematics or English Composition.

(*c*) Instructions, showing the extent of the Examination, will be issued to the successful Candidates as soon as possible after the result of the Open Competition is declared.

* The principal Vernacular Language prescribed for each Province to which Candidates are assigned is as follows:—

For Madras	Tamil or Telugu	At the option of the Candidate
For the Lower Provinces of Bengal . .	Hindustani or Bengali	At the option of the Candidate

In Hindustani the Candidate will be required to be acquainted with both the Persian and the Nagari character; and in the case of the last two Provinces mentioned above, a Candidate whose Vernacular Language is either of the languages shown against his Province, must offer the other for examination.

† These subjects may not be offered by any Candidate who has offered them at the Open Competition.

(2) Again, at the time of the Final Examination, Candidates who may fully satisfy the Commissioners of their ability to ride well and to perform journeys on horseback, shall receive a Certificate which shall entitle them to be credited with 200 or 100 marks according to the degree of proficiency displayed, to be added to their marks in the Final Examination.

(3) Candidates who fail to obtain this Certificate, but who gain a Certificate of minimum proficiency in Riding, will be allowed to proceed to India, but will be subjected on their arrival to such further tests in Riding as may be prescribed by their Government, and shall receive no increase to their initial salary until they have passed such tests to the satisfaction of that Government. A Candidate who fails at the end of the year of probation to gain at least the Certificate of minimum proficiency in Riding will be liable to have his name removed from the list of Selected Candidates.

11. The Selected Candidates who, on examination, shall be found to have a competent knowledge of the subjects specified in Regulation 9, and who shall have satisfied the Civil Service Commissioners of their eligibility in respect of nationality, age, health, character, conduct during the period of probation, and ability to ride, shall be certified by the said Commissioners to be entitled to be appointed to the Civil Service of India, provided they shall comply with the regulations in force, at the time, for that Service.

12. Persons desirous to be admitted as Candidates must apply on Forms, which may be obtained from "The Secretary, Civil Service Commission, London, W.," at any time after the 1st December, in the year previous to that in which the Examination is to be held. The Forms must be returned so as to be received at the office of the Civil Service Commissioners on or before the 1st July (or, if that date should fall upon a Sunday or public holiday, then, on or before the first day thereafter on which their office is open) in the year in which the Examination is to be held.

The Civil Service Commissioners are authorized by the Secretary of State for India in Council to make the following announcements:—

(i) *Selected Candidates will be allotted to the various Provinces upon a consideration of all the circumstances, including their own wishes; but the requirements of the Public Service will rank before every other consideration.*

(ii) *An allowance amounting to £100 will be given to all Candidates who pass their probation at one of the Universities or Colleges which have been approved by the Secretary of State*, viz., *the Universities of Oxford, Cambridge, Dublin, Glasgow, Edinburgh, St. Andrews and Aberdeen; Victoria University, Manchester; University College, London; and King's College, London: provided such Candidates shall have passed the Final Examination to the satisfaction of the Civil Service Commissioners, and shall, in the opinion of the Secretary of State, have conducted themselves well and complied with such rules as may be laid down for the guidance of Selected Candidates. The whole probation must ordinarily be passed at the same Institution. Migration will not be permitted, except for special reasons approved by the Secretary of State.*

(iii) *The allowance of £100 will not be paid to any Selected Candidate until he has been certified by the Civil Service Commissioners to be entitled to be appointed to the Civil Service of India; and every Certificated Candidate must, before receiving his allowance, give a written undertaking, to refund the amount in the event of his failing to proceed to India.*

(iv) *All Candidates obtaining Certificates will be also required to enter into covenants, by which, amongst other things, they will bind themselves to make such payments as under the rules and regulations for the time being in force they may be required to make towards their own pensions or for the pensions of their families. The stamps payable on these covenants amount to £1.*

(v) *The seniority in the Civil Service of India of the Selected Candidates will be determined according to the order in which they stand on the list resulting from the combined marks of the Open Competitive and Final Examinations.*

(vi) *Selected Candidates will be required to report their arrival in India within such period after the grant of their Certificate of Qualification as the Secretary of State may in each case direct.*

(vii) *Candidates rejected at the Final Examination held in any year will in no case be allowed to present themselves for re-examination.*

N.B.—A Manual of Rules and Regulations applicable to members of the Covenanted Civil Service of India has been compiled by permission of the Government of India, and may now be procured either from Messrs. A. Constable & Co., 2 Whitehall Gardens, S.W. or from Mr. E A. Arnold, 37 Bedford Street, Covent Garden. Price 2*s.* 6*d.*

The Commissioners have been requested by the Secretary of State for India to draw the attention of Selected Candidates to the prefatory note attached to this manual, as it is considered important that it should be clearly understood that this compilation is not to be regarded in any other light than that of a collection, made for facility of reference, of certain information and rules; that it is by no means exhaustive, and that it is liable to such modifications as may from time to time be sanctioned by competent authority.

CIVIL SERVICE OF INDIA;

CLERKSHIPS (CLASS I) IN THE HOME CIVIL SERVICE; AND EASTERN CADETSHIPS.

Syllabus showing the extent of the Examination in certain subjects.

English Composition.—An Essay to be written on one of several subjects specified by the Civil Service Commissioners on their Examination Paper.

English Language and Literature.—The Examination will be in two parts. In the one the Candidates will be expected to show a general acquaintance with the course of English Literature, as represented (mainly) by the following writers in verse and prose, between the reign of Edward III and the accession of Queen Victoria:

Verse—Chaucer, Langland, Spencer, Shakespeare, Milton, Dryden, Pope, Gray, Collins, Johnson, Goldsmith, Crabbe, Cowper, Campbell, Wordsworth, Scott, Byron, Coleridge, Shelley, Keats.

Prose—Bacon, Sir Thomas Browne, Milton, Cowley, Bunyan, Dryden, Swift, Defoe, Addison, Johnson, Burke, Scott, Macaulay (Essays and Biographies).

A minute knowledge of the works of these authors will not be looked for in this part of the Examination, which will, however, test how far the Candidates have studied the chief productions of the greatest English writers *in themselves*, and are acquainted with the leading characteristics of their thought and style, and with the place which each of them occupies in the history of English Literature. Candidates will also be expected to show that they have studied in these authors the history of the English Language in respect of its vocabulary, syntax, and prosody.

The other part of the Examination will relate to one of the periods named below, which will follow each other year by year in the order indicated:—

1.	A.D. 1360 to A.D. 1600.
(1904)	[Chaucer to Spencer.]
2.	A.D. 1600 to A.D. 1700.
(1905)	[Shakespeare to Dryden.]
3.	A.D. 1700 to A.D. 1800.
(1906)	[Pope to Cowper.]
4.	A.D. 1800 to A.D. 1832.
(1907)	[Nineteenth Century writers to the death of Scott.]

The Examination in this part will require from Candidates a more minute acquaintance with the history of the English Language and Literature, as illustrated in the chief works produced in each period, and will be based to a considerable extent, but by no means exclusively, on certain books specified each year by the Commissioners.* The names placed under the dates are intended to suggest the general character of the literary development of the period, and, consequently, the natural limits of the Examination. All the works of Shakespeare, for example, will be regarded as falling within the period 1600 to 1700; all the works of Swift within the period 1700 to 1800; all the works of Scott and Wordsworth, and all the works of Macaulay within the period 1800 to 1832.

French Language and Literature.—Translation and Composition. Critical questions on the French Language and Literature. Conversation.

German Language and Literature.—Translation and Composition. Critical questions on the German Language and Literature. Conversation.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 23.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 4th August, 1903:

NO. 10 OF 1903.

A Bill to provide for the regulation of the possession and sale of all poisons in certain local areas, and the importation, possession and sale of white arsenic generally.

WHEREAS it is expedient to provide for the regulation of the possession and sale of all poisons in certain local areas, and the importation, possession and sale of white arsenic throughout the whole of British India; It is hereby enacted as follows:

Short title and extent.

1. (1) This Act may be called the Poisons Act, 1903; and

(2) It extends to the whole of British India.

Poisons generally.

Power to regulate possession for sale and sale of any poison in certain areas.

2. (1) Subject to the control of the Governor General in Council, the Local Government may, by rule, regulate within the limits of any municipality or cantonment the possession for sale and the sale, whether wholesale or by retail, of any poison.

(2) In particular, and without prejudice to the generality of the power conferred by sub-section (1), rules made thereunder may provide for, amongst other matters,—

(a) the grant of licenses to possess any poison for sale, wholesale or by retail;

(b) the classes of persons to whom alone such licenses may be granted;

(c) the classes of persons to whom alone any poison may be sold;

(d) the maximum quantity of any poison which may be sold to any one person;

(e) the maintenance by vendors of any poison of registers of sales, the particulars to be entered in such registers, and the inspection of the same; and

(f) the labelling of packets in which any poison is sold or possessed for sale.

White Arsenic.

Power to prohibit importation into British India of white arsenic except under license.

3. The Governor General in Council may, by notification in the Gazette of India, prohibit, except under and in accordance with the conditions of a license, the importation of white arsenic into British India, and may, by rule, regulate the grant of licenses and prescribe the conditions to be imposed thereby under this section.

Power to regulate possession for sale and sale of white arsenic throughout province.

4. (1) Subject to the control of the Governor General in Council, the Local Government may, by rule, regulate within the whole or any part of the

6 a

territories under its administration the possession for sale and the sale, whether wholesale or by retail, of white arsenic.

(2) In particular and without prejudice to the generality of the power conferred by sub-section (1), rules made thereunder may provide, amongst other matters, for all or any of the matters specified in section 2, sub-section (2).

(3) Rules made under sub-section (1) may further provide that no person shall sell any powdered white arsenic unless the same is, before the sale thereof, mixed with soot, indigo or Prussian blue in the proportion of half an ounce of soot, indigo or Prussian blue at least to one pound of the white arsenic, and so in proportion for any greater or less quantity:

Provided that, where such arsenic is stated by the purchaser to be required for some purpose for which such admixture would, according to the representation of the purchaser, render it unfit, such arsenic may be sold, without such admixture, in a quantity of not less than ten pounds at any one time.

Power to regulate possession of white arsenic in certain tracts.

5. (1) The Local Government, with the previous sanction of the Governor General in Council, may further, by rule, regulate the possession of white arsenic in any local area in which murder by poisoning with that drug or the offence of mischief by poisoning cattle therewith appears to it to be of such frequent occurrence as to render restrictions on the possession thereof desirable.

(2) In making any rule under sub-section (1), the Local Government may direct that any breach thereof shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both, together with confiscation of the white arsenic in respect of which the breach has been committed, and of the vessels, packages or coverings in which the same is found.

Other Poisons.

[Cf. VIII of 1899, s. 22 (1).]

Power to apply Act to other poisons.

6. The Governor General in Council may, by notification in the Gazette of India, apply to any poison other than white arsenic all or any of the provisions of this Act relating exclusively to white arsenic.

Penalties and Procedure.

Penalty for unlawful importation, etc.

7. (1) Whoever,—

(a) commits a breach of any rule made under section 2 or section 4, or

(b) imports into British India, without a license, white arsenic the importation of which is for the time being restricted under section 3, or

(c) breaks any condition of a license for the importation of white arsenic granted to him under section 3,

shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both.

(2) Any poison in respect of which an offence has been committed under this section, together with the vessels, packages or coverings in which the same is found, and any animals and conveyances used in carrying it, shall be liable to confiscation.

Power to issue search-warrant.

8. (1) The District Magistrate, the Sub-divisional Magistrate and, in a Presidency-town, the Commissioner of Police, respectively, may issue a warrant for the search of any place in which he has reason to believe or to suspect that any poison is possessed for sale or sold in contravention of this Act or any rule thereunder or that any poison liable to confiscation under this Act is kept or concealed. [Cf. XII of 1896, s. 40.]

(2) The person to whom the warrant is directed may enter and search the place in accordance therewith, and the provisions of sections 47 to 49 of the Code of Criminal Procedure, 1898, shall, as far as may be, be deemed to apply to the execution of the warrant. V of 1898.

Previous publication, etc., of rules.

9. (1) Every power to make rules conferred by this Act is subject to the condition of the rules being made after previous publication. [Cf. VIII of 1899, s. 24.]

(2) All rules made by the Governor General in Council or by the Local Government under this Act shall be published in the Gazette of India or the local official Gazette, as the case may be, and on such publication shall have effect as if enacted by this Act.

Savings.

(e) by a tanner or hide-merchant.

(2) Notwithstanding anything hereinbefore contained, the Local Government may in its discretion, by general or special order, declare that all or any of the provisions of this Act shall not be deemed to apply to any article, or class of articles, of commerce specified in such order or to any poison, or class of poisons, used for any purpose so specified, and may, from time to time, alter or vary any such declaration.

STATEMENT OF OBJECTS AND REASONS.

THE question of restricting by legislation the sale and possession of poisons in India has been under the consideration of the Government for many years. It was at one time thought that the working of a general law on the subject would be attended with such difficulties as to render its enforcement all but impracticable. Among the reasons for this conclusion were the facts that some mineral poisons are largely used for legitimate purposes connected with trade, and that, since plants from which vegetable poisons can be extracted grow all over the country and are readily accessible, any restriction on the sale and possession of mineral poisons might result in inducing criminals to have recourse to the more subtle and less easily detected vegetable poisons, which could in no case be placed beyond their reach. On further consideration, however, it seems to the Government of India to be an extraordinary anomaly, which should be removed with the least practicable delay, that a deadly poison, such as arsenic, which is without taste or smell, which produces effects very similar to those of cholera, and which is known to be the agent most frequently employed for homicidal purposes, should be procurable in unlimited quantities in every part of India. There is, so far as the Government of India are aware, no other civilized country in the world in which the sale and possession of poisons is not carefully restricted, and it is thought that, notwithstanding the special conditions prevailing in India, a beginning at least in the direction of legislation should be made. This view is supported by the great mass of opinion which has been obtained from Local Governments and Administrations and from the several Chambers of Commerce and Trades Associations.

2. The only measure in the Indian Statute-book dealing with poisons generally is Bombay Act VIII of 1866; but that enactment extends only to the Province of Bombay, and even there, owing to defects in its form and limitations in its scope, it has produced but little effect. No provision is made in it for the inspection or searching of vendors' shops, and it places no restriction on the amount of poison which may be possessed or sold. In the United Provinces the matter is regulated by rules under section 128 (*r*) of the North-Western Provinces and Oudh Municipalities Act, 1900; but these have not been rigidly enforced and seem to have been virtually inoperative. The experience of the United Provinces seems, indeed, to show that the matter is one which cannot with safety be left to municipal control.

3. The present Bill provides in the first place (clause 2) for the control of the sale of poisons generally within municipalities and within cantonments, which often adjoin municipalities. It also (clause 3) authorises the prohibition of the importation of white arsenic into British India except under license, and (clauses 4 and 5) empowers the Local Government to regulate the sale of that poison within the whole or any part of the Province, and its possession in any area in which murder by poisoning with that drug, or the offence of mischief by poisoning cattle, is of frequent occurrence. It further (clause 6) takes power for the Governor General in Council to apply to any other poison the provisions relating to white arsenic, and thus there will be an immediate remedy at hand should it be found that other poisons are beginning to take the place of white arsenic for criminal purposes. Finally protection is secured (clause 10) for acts done in good faith by members of the medical profession and by chemists and others who deal with poisons in the ordinary course of their business. The measure will be permissive, and its effectiveness will depend entirely upon the extent to which it is applied, and upon the success attained in framing and enforcing rules under it.

GOVERNMENT OF INDIA.

Provided that the Local Government may, with the previous sanction of the Governor General in Council, from time to time, by notification in the local official Gazette, direct that leases of immoveable property, other than leases from year to year, or for any term exceeding one year, or reserving a yearly rent, may be made by unregistered instrument or by oral agreement without delivery of possession."

Amendment of section 117, Act IV of 1882.

6. In section 117 of the said Act, after the words "to be so applicable" the words "in the case of all or any of such leases" shall be inserted.

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to make certain amendments in the Transfer of Property Act, 1882, which the Government of India have decided to undertake for the following reasons.

2. Under the Indian Registration Act, 1877, registration is compulsory in the case of certain documents and merely optional in that of others. Documents of the first class are practically of no effect unless registered, but those belonging to the latter are equally effective, whether registered or not, subject to this limitation, that, if unregistered, they are liable to be superseded by subsequent registered documents. Among the documents the registration of which is optional are those relating to the transfer of rights in immoveable property of less than Rs. 100 in value, and it is in consequence of the questions that have

arisen in connection with this latter class of documents that the present Bill has been prepared.

3. There was at one time a diversity of opinion as to the effect of section 50 of the Registration Act, which postpones all unregistered documents relating to land of which the registration is optional to a subsequent registered one of the same character. But it has recently been decided by all the chartered High Courts as well as by the Chief Court of the Punjab, that the section should be read subject to the equitable doctrine of notice, or, in other words, that an unregistered document should not be postponed to a registered one where it can be shown that the transferee under the latter had notice of the transfer evidenced by the former at the time when the latter was executed. These rulings did not appear to the Government of India to leave the law on a satisfactory footing. They learnt that in England there had been divergence of opinion with regard to the propriety of the recognition of the equitable doctrine of notice in connection with the construction of the English Registry Acts, and that that doctrine had in 1884 been deliberately abolished by Parliament in the case of the Yorkshire Registry, whilst past experience in this country had shown that the application of that doctrine in India was open to very grave objection. The Indian Registration Law prior to Act I of 1843 expressly provided for notice, and, as stated in the preamble to that Act, it was in consequence of the "forgeries, perjuries, fraudulent concealments and other practices" to which the application of the doctrine gave rise that that Act, which ignored the doctrine, was passed.

4. After giving the whole question very careful consideration the Government of India came to the conclusion that, instead of attempting to amend the provisions of the Registration Law as to priority between registered and unregistered instruments relating to the transfer of land in order to meet the difficulties to which the existing law gives rise, the better course would be so to amend the law on the subject of transfer of immoveable property as to make it impossible for such difficulties to arise in the case of future transfers of such property. It seemed to them that this result could be obtained if the law required all transfers of such property throughout India, when effected by written instruments, to be registered. They accordingly asked the opinion of Local Governments on the following proposals designed to carry out this intention :

(1) that the whole or certain sections of the Transfer of Property Act, 1882, should be extended to the parts of British India to which that Act had not yet been extended under the powers conferred by section 1, namely, the Punjab, and Lower Burma outside Rangoon ;

(2) that section 59 of the Act (relating to mortgages) should be amended so as to require all mortgages effected by written instruments to be registered, whatever the amount secured ; and

(3) that section 107 of the Act (relating to leases) should be amended so as to require all instruments of lease to be registered and all leases made by oral agreement to be accompanied or followed by possession.

5. With regard to the first point the Government of the Punjab objected strongly to the extension of the Act to that Province, and, as the arguments advanced by the Local Government against this proposal seemed to the Government of India to be of much force, this proposal has been abandoned in so far as the Punjab is concerned. The Government of Burma desired (1) to extend the whole of the Act to the towns of Moulmein, Bassein and Akyab, and to include those towns in the list of towns contained in sections 59 and 69; (2) to extend sections 54, 59, 107, 117, 118 and 123 to the whole of Lower Burma with the exception of areas to which the Registration Act does not apply and of specially backward tracts; and (3) to take power to extend from time to time any part of the Act which may appear to it to be suitable to any part of the province. The amendments of the Act proposed in clauses 2 and 4 of the Bill are designed to enable the Local Government to give effect to its wishes in this respect.

6. Apart from the Punjab, all Local Governments accepted the second proposal which is given effect to by the amendment of the second paragraph of section 59 of the Act contained in clause 3 of the Bill. The proviso which it is further proposed to add to the same section of the Act is intended to give effect to a suggestion of the Government of Bengal that Local Governments should have power to require mortgages made within their territories, even when securing a less sum than Rs. 100, to be effected by registered instrument.

7. The third proposal was accepted by all Local Governments except the Governments of Bombay and Bengal, in deference to whose objections the Government of India have, while amending the second paragraph of section 107 of the Act, as originally proposed, in clause 5 of the Bill, added at the same time to the revised section a proviso reserving power to Local Governments to adopt or not to adopt, as they may think fit, the revised section in their respective provinces.

8. The Chief Commissioner of the Central Provinces made a further suggestion that a proviso should be added to section 107 of the Act on the lines of the proviso to section 17 of the Indian Registration Act in order to encourage the application of Chapter V of the latter Act to agricultural leases. Though the principle of the suggestion is accepted by the Government of India, it appears to them that it will be more simply and conveniently given effect to by amending section 117 of the Act as proposed in clause 6 of the Bill, so as to give power to Local Governments to limit the scope of any notification issued under that section to particular classes of agricultural leases.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 4th August, 1903:

NO. 12 OF 1903.

A Bill further to amend the Indian Tariff Act, 1894.

VIII of 1894. WHEREAS it is expedient further to amend the Indian Tariff Act, 1894; It is hereby enacted as follows:

Short title and duration.

1. (1) This Act may be called the Indian Tariff (Amendment) Act, 1903.

(2) Section 3 shall remain in force until the thirty-first day of March, 1904.

VIII of 1894. Amendment of section 8A, Act VIII, 1894.

2. In section 8A, sub-section (1), of the Indian Tariff Act, 1894, as amended by section 2 of the Indian Tariff Amendment Act, 1899, before the words "the exportation therefrom" the words "the production therein or" shall be inserted. XIV of 1899.

Addition of new section, 8C, to Act VIII, 1894.

3. After section 8B of the Indian Tariff Act, 1894, as amended by section 2 of the Indian Tariff (Amendment) Act, 1902, the following section shall be added, namely: VIII of 1894. VIII of 1902.

Continuation of duties chargeable under section 8A or 8B on 31st August, 1903.

"8C. Notwithstanding that the condition precedent to the imposition of a duty under section 8A may have ceased to exist, and notwithstanding anything in section 1, sub-section (2), of the Indian Tariff (Amendment) Act, 1902, any duties which may have been imposed and are chargeable under section 8A or section 8B on the thirty-first day of August, 1903, shall continue to be chargeable in accordance with any rules which may have been in force on the said date: VIII of 1902.

Provided that the Governor General in Council may, by notification in the Gazette of India, reduce the rate at which any such duty is levied, and amend or vary any such rules as aforesaid."

STATEMENT OF OBJECTS AND REASONS.

SECTION 8A of the Indian Tariff Act, 1894, provides for the levy of an additional duty on articles on which a bounty is given directly or indirectly by a foreign State, and section 8B provides for the levy of additional duties in certain cases in which high protective duties render possible the creation of bounties by private trade combinations or cartels. The majority of the chief sugar-producing countries of Europe have agreed to arrangements designed to secure the abolition of all bounties and high protective duties on sugar on the 1st of September, 1903. Large stocks of sugar exist in those countries on which bounties have been paid and which have been produced under the cartel system. The object of this Bill is to continue the present additional duties on sugar until the 31st of March, 1904, when it is expected that the greater part of the stocks which have received bounties will have been consumed.

The opportunity has been taken to make it clear that section 8A of the Act of 1894, as amended in 1899, extends to bounties or grants paid or bestowed upon production as well as upon exportation.

During the quarter the prices of all kinds of salt showed an upward tendency. The marked fluctuations in the price of Muscat salt were due to the small stocks of *karkatch* salt in bond, and also to the fact that the prices quoted are of two qualities. The variations in the price of Bombay salt were also due to the small stocks in bond.

10. The following Table (V) shows the quantity of sea-imported salt admitted into bond and cleared from bond and shipboard at the several out-ports and inland warehousing stations:—

WORKING OF TREASURIES IN BENGAL DURING THE YEAR 1902-1903.

FINANCIAL DEPARTMENT—FINANCE.

Calcutta, the 13th August 1903.

RESOLUTION—No. 3305F.

READ—

A letter from the Accountant-General, Bengal, No. 182T.M., dated the 31st May 1903, reporting on the working of treasuries in Bengal for the year 1902-1903.

THE aggregate number of irregularities committed during the past year shows a decrease of 7,016 as compared with those detected in the preceding year, and the Lieutenant-Governor notices with satisfaction that the result of calling attention to those errors in past years has been to materially diminish the number of them, inasmuch as Treasury Officers have thus been made familiar with the commonest forms of such defects.

2. No serious mistakes were committed in the treasuries at Calcutta, Noakhali, Chittagong, Champaran, Muzaffarpur, Angul and Khondmals and Puri.

3. The smallest number of irregularities occurred at Manbhum (10), and the treasuries at Dumka, Malda, Murshidabad, and Jalpaiguri were responsible for only 18, 19, 21, and 25 errors, respectively.

4. Very great improvement took place in the administration of the treasuries at Hooghly, Muzaffarpur, Champaran, Shahabad, Tippera, Cuttack, Bhagalpur, Murshidabad and Purnea. Considerable improvements are noticeable also in the cases of Rajshahi, Patna, Dacca, Backergunge, and 24-Parganas, although in each of these treasuries a few serious errors occurred.

5. The Accountant-General has brought to notice the names of certain Treasury Officers, who are most deserving of commendation for the good work achieved by them in improving the working of the treasuries of which they were in charge during the year under review. These are—

PRELIMINARY FORECAST OF THE SUGACANE CROP OF BENGAL, 1903.

THE following note is published for general information.

A. EARLE,
Offg. Secy. to the Govt. of Bengal.

The 17th August 1903.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Preliminary Forecast of the Sugarcane Crop of Bengal, 1903.

Explanatory.—With Government order No. 114T.—R., dated the 22nd May 1899, instructions were received for including in this forecast an estimate of the raw sugar produced in these Provinces from other sources than cane, and an attempt is made to give effect to the above order in the present report, but the information available on the subject is yet far from complete.

2. *The character of the season.*—The drought which commenced in the beginning of October 1902 lasted till after the end of the year. The rainfall in January and February was deficient everywhere, except in the Orissa and Chittagong Divisions and in parts of the Burdwan, Presidency, and Dacca Divisions. In March, there were fairly good showers throughout Bengal, although Bihar and Chota Nagpur continued to suffer from the drought. The fall in April and May was in defect everywhere, except Chota Nagpur, and the deficiency continued through June all over the Province, save in North Bengal, in the North Gangetic districts of Bihar, in some parts of the Presidency Division, and in Dacca, Mymensingh, Tippera and Noakhali in East Bengal. The rains during the past month were general but scanty almost throughout the Province, and more rain is urgently needed at this moment in the Burdwan, Presidency, Patna, and Bhagalpur Divisions, and in some districts of the Rajshahi, Chittagong, and Chota Nagpur Divisions. On the whole, the season has not been favourable to the sugarcane crop.

3. *Area sown.*—The normal area under sugarcane in this Province is now estimated at 689,100 acres, against 682,600, returned last year. It is estimated that the area planted this year is 643,000 acres, the contraction being due to the unfavourable character of the sowing season.

4. *Character of the crop*—It will be seen from the summary of the district returns appended to this report, that

in eleven districts the outturn is expected to reach or exceed the normal, while nine other districts anticipate an outturn of over 90 per cent. In eleven districts the estimate varies between 80 and 89 per cent., while in the remaining fourteen districts crops from 59 to 79 per cent. of the normal are anticipated.

5. *Outturn.*—According to the estimates of the District Officers, the outturn of the crop for the Province as a whole will this year amount to 89 per cent. of a normal crop. But a tendency to underestimate the crop is observable in the important sugarcane-growing districts of East Bengal, and I anticipate that under normal conditions for the rest of the year, the provincial outturn will reach 92 per cent. of a normal crop.

Offg. Director of Land Records and Agriculture, Bengal.

Burdwan ...	Burdwan ...	1,720,960	1,284,200	27,400	27,900	27,700	81	76	The monsoon is late this year. June rains were deficient, and it has been found on enquiry that want of proper rains at the end of May affected the seedlings. Hence a comparatively low outturn is expected.	
	Birbhum ..	1,121,920	900,000	9,000	9,000	9,000	80	100		
	Bankura ...	1,077,440	642,800	14,000	15,000	13,000	90	100	The area is below the normal, but the outturn may now be estimated at 100 per cent.

	Hooghly ...	1,087,360	652,300	14,500	14,300	13,600	99	58	Want of timely rainfall is the cause of the decrease in outturn.	
Presidency ...	24-Parganas .	3,574,851	1,079,700	4,900	4,400	4,400	105	95	The figures in columns 4 and 5 have been revised. Want of seasonable rainfall accounts for the low outturn this year.	
	Nadia ...	1,787,520	630,500	11,400	7,500	5,700	75	69	The decrease in the area and outturn is due to want of seasonable rainfall.	
	Murshidabad	1,371,520	985,500	14,700	14,600	14,500	81	88	The decrease in the area sown is due to the fact that the market was low last year.	
	Jessore ...	1,872,000	1,142,100	15,000	12,400	9,300	74	79	Failure of this crop last year and want of rainfall during the sowing time this year are the chief causes of the decrease in area under this crop.	
	Khulna ...	3,103,942	870,000	3,100	1,200	600	100	75	For want of rain, half the land could not be cultivated for the sugarcane crop, and the outturn is expected to be below the normal for the same reason.

	Dinajpur ...	2,526,080	1,697,600	25,000	30,000	25,000	110	100	The low outturn is due to want of rains at the time of the planting of the crop.	
	Jalpaiguri ...	1,894,600	925,000	5,000	4,400	4,100	50	75	The decrease in area and outturn is due to want of seasonable rain.

	Pabna ...	1,176,960	882,500	3,500	3,100	3,200	60	90		
Dacca ...	Dacca ...	1,780,480	1,213,360	20,000	20,000	19,900	91	100	The subdivisional reports show that for want of timely rain this year the outturn is expected to be less than that of the last year. But as I think the outturn was estimated last year at less than its real value there is a discrepancy in the figures. This year's crop will probably be about normal.	
	Mymensingh	4,062,480	2,405,700	35,000	33,500	34,000	81	92		
	Faridpur ...	1,459,840	1,132,600	42,000	35,000	30,000	75	75	The area under sugarcane is gradually decreasing.	
	Backergunge	2,335,360	1,418,000	20,500	20,000	18,500	80	75	The outturn is expected to be below the normal owing to want of rainfall at the sowing season, which has also decreased the area sown from that of last year. The outturn of date-gur is expected to be normal.	

Chittagong ...	Tippera ...	1,529,360	1,209,000	8,800	8,700	7,900	63	83	The figures in columns 4, 5, and 6 have been revised.

	Chittagong ...	1,594,515	559,800	9,200	9,000	9,000	80	75	The low outturn is due to insufficient rainfall.
Patna ...	Patna ...	1,328,000	1,082,100	20,200	1,000	20,000	82	100	The figures in columns 3, 5, and 7 have been revised.
	Gaya ...	3,015,680	2,207,500	29,000	29,500	29,400	100	100	
	Shahabad ...	2,798,720	1,841,800	36,000	41,100	34,300	73	89	The decrease in the area 'sown' is due to want of sufficient moisture at the sowing season.
	Saran ...	1,708,726	1,357,800	36,500	46,800	42,600	85	75	The failure of winter rains has told much upon the area and prospects of the crop this year. Rain also failed at the time of planting and germinating.

	Purnea ...	3,195,513	1,639,800	7,000	7,000	7,000	84	65	The outturn is not 'satisfactory' owing to the lateness of the rainfall.
	Malda ...	1,216,000	675,900	5,000	3,900	3,000	100	90	The decrease both in area and outturn is due to want of sufficient rainfall at the time of planting.
